

PRESTON INNOVATIONS BOXES

QUALITY DESIGNS, PERFECT SOLUTIONS.

You have never had it so easy is a phrase we have all heard – but it might have been coined for discerning anglers who choose to use the brilliant Preston Innovations OnBox, OffBox and InBox system.

With boxes, accessories and an internal organisation system that is second to none, is it any wonder that this is the total solution.

All our Box products are unique to us. This includes OnBox, OffBox and InBox. We design, test and develop them and have them manufactured to our exact specifications. This ensures that they work and meet your expectations.

No other tackle company in the world sells Box products made by us. There may be some who copy them and even make them look almost the same, but unless it says OnBox on the product, it isn't!

The Preston Innovations Box range (On, Off and In) is now an established part of match fishing in the UK and offers the most comprehensive seatbox solution.

Our new range of XS seatboxes, plus the revised Space Station form the main part of the range, whilst the huge selection of OffBox and InBox accessories all work together perfectly to make the ultimate seatbox system.

Continual Development

Working on the principle of giving you what you want and what you need, the range is continually evolving and being improved. An example of this was the previous introduction of a redesigned OffBox knuckle that is easier to use. This year sees further additions to the range of boxes which feature new style clips which are not only easier to use but also more secure.

Versatile Choice

Another thing that we do is give you versatile choice. As anglers ourselves we realise that not everyone is the same. Different anglers prefer different options, not only with the box they sit on

but also the accessories they use to make fishing more efficient. The introduction of the Accessory Tool Bar gives you more space to use OffBox Accessories. It was designed as a direct result of anglers wanting to use more OffBox accessories than could be fitted to the seatbox legs.

Where Will It Stop

With more products being introduced there is one issue we haven't forgotten - transporting all of your gear. When we designed the Space Shuttle we thought it would be used by anglers using the Space Station seatbox, what we didn't anticipate was the high demand for a high quality transport system. Designed to carry everything, in as few trips as possible, the Shuttle has been a big success with anglers using all types of seatboxes. So, however many OffBox accessories you own, you can be sure that by using the Space Shuttle you'll be able to transport them quickly and efficiently.

InBox Success

InBox accessory storage works perfectly with the OnBox seatboxes and the small boxes fit perfectly into the drawers. So do the Slider Winders, which can be stored in the drawers, under the seat or in Add On units.

It's Your Choice

Whatever box you sit on and whatever accessories you prefer, you can be sure that the Box range will provide you with the perfect solution.

“Working on the principle of giving you what you want and what you need, the range is continually evolving and being improved.”

SPACE STATION XSII

Extra versatility comes as standard.

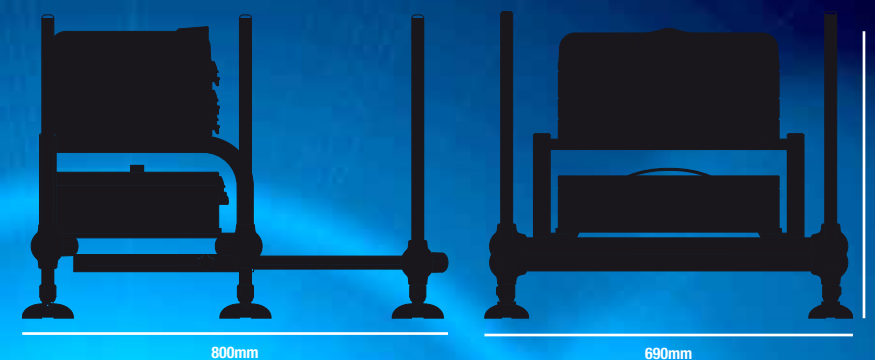

“The new XSII is so versatile – whether I’m fishing The World Championships or festivals – it’s the only one for me.”

Des Shipp

■ SPACE STATION XSII

The new Space Station XSII features a lower frame than the previous Space Station which allows more units to be added under the seat. This makes it more versatile. It comes with a two compartment tray fitted directly to the frame, a deep draw unit and a two compartment add on unit which can be used either attached to the deep base unit as part of a stacking system or fitted above the frame. The new style footplate offers increased grip thanks to a new covering finish and a more stable base.

Continuing with the large footprint and large profile legs from previous Space Stations the XSII features non marking legs and cassette style slide out footplate. Comes supplied with full instructions and parts to convert the two compartment unit into a sliding unit which fits into the frame.

“Whichever box you sit on, whichever accessories you prefer, you can be sure that The Box Range will provide you with the perfect solution.”

supplied) See page 24.

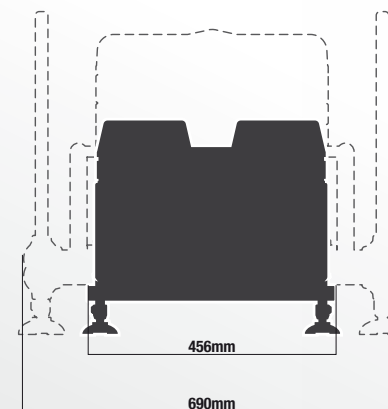

New side locking catch locks the base unit securely in place and is easy to access.

NEW

SPACE STATION COMPACT

The Space Station Compact has been developed to offer all the benefits of other Space Stations but with a more compact frame system to make transportation easier. It also features a removable footplate which is adjustable on the leg system to allow the angler to adjust the footplate to suit their most comfortable fishing position.

The Compact comes with a two compartment unit fixed to the frame a deep draw and a deep sliding compartment which fits under the frame, it also has a covered footplate which provides a stable fishing platform.

The Space Saver Seatbox – compared to the Space Station XSII

Space Saver Accessory Block (one included FREE with every Space Saver Box) allows use of Offbox accessories

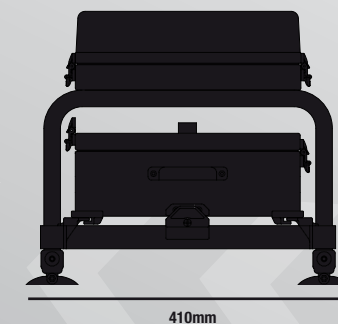

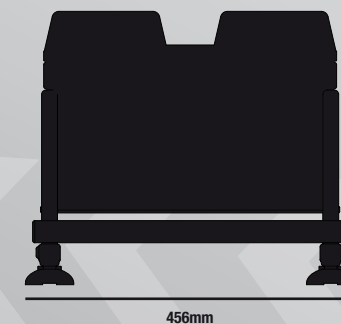

NEW

PRESTON INNOVATIONS

SPACE SAVER

The new Space Saver Space Station is a solid, reliable addition to the Space Station range that has a small footprint making it easy to transport, and store when not in use.

SPACE SAVER

The Space Saver has integral adjustable legs that move within the hollow frame, and therefore it's supplied without a footplate. OffBox accessories can be attached thanks to a unique bracket that attaches to the frame. A 90mm Base Unit is attached to the base of the frame on runners, with the new side locking catch design.

On top of the frame is a two Compartment Add-on unit and our OnBox pole seat. Every Space Saver Box comes complete with The Space Saver Accessory Block – allowing the use of OffBox accessories. Further Accessory Blocks can be purchased if required to add even further versatility.

■ XS TELESCOPIC EXTENDING LEGS

Suitable for replacing standard fixed length legs. Length: 50cm

■ XS LEG EXTENDER

Suitable for all XS Space Station seatboxes and XS OnBox models.

■ SEAT COVER

A water-resistant OnBox cover is available – fits all OnBoxes

Platforms...perfect for providing an ultra-stable platform when faced with uneven banks.

■ SPACE SAVER PLATFORM

The Space Saver Platform features a lightweight aluminium 770mm x 500mm area which is ideally suited to seat boxes without footplates – it can also be used as a large bait table. Features Space Station legs, which are completely compatible with all the OffBox accessories, making it suitable for boxes without adjustable leg systems.

The Space Saver Platform is for boxes without a built-in foot platform. All legs are stored within the base for easy transport.

■ 2-PIECE PLATFORM

The 2-Piece Platform features a large lightweight aluminium 770mmx700mm area which breaks down into two pieces for ease of transportation.

Large enough to accommodate our Space Station seat box along with many other manufacturers' boxes, the larger profile legs offer a super stable fishing platform and is completely compatible with OffBox accessories making it the complete fishing station.

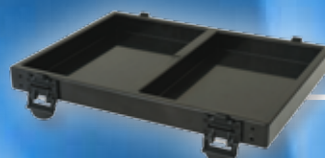

■ XS POLE SEAT

Pole seat with pole retaining strap.

■ XS 2 COMPARTMENT SHALLOW ADD ON UNIT

25mm deep shallow add on unit, divided to fit InBox pop-up winder trays. Available with or without runners

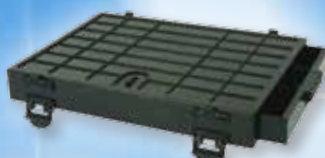

■ XS SHALLOW SIDE DRAWER UNIT

20mm shallow through drawer unit.

■ XS DEEP SIDE DRAWER UNIT

40mm deep through drawer unit.

■ XS STACKING UNIT LID

Attaches to any unit in the range, complete with carrying handle.

■ XS SPACE STATION 90MM SLIDING ADD ON UNIT

90mm sliding Space Station unit (with runners to fit under Space Station units).

“Using Add On units with my seatbox means my rigs and accessories are always to hand – crucial during any match situation.”

Des Shipp

England International

To complement the Space Station XS and XS Box ranges there is a comprehensive selection of OnBox Add-On units. These can be used to customise your seatbox to suit your personal preference.

Whether you need more winder storage, more accessory storage, or just want additional units to make a stacking system, there are units available.

If you fish a wide variety of venues, the use of Add On units and a Stacking Unit Lid enable you to transport a huge range of accessory tackle and rigs to the venue without having to change your standard box configuration.

SPACE STATION

ON
BOX

■ X6S ONBOX

The X6S seatbox has been developed with larger profile legs to make it more stable. These feature non-marking knuckles and increased sized swivel mud-feet. The cassette style footplate slides neatly underneath the box for easy carriage and has a full non-slip cover.

The X6S comes with two shallow (20mm) front drawers, two deep front drawers (40mm) and one full width drawer which is divided to take Inbox winder trays and one deep through divided drawer to take most popular terminal tackle items.

The units have new positive plastic clips and hinges which allow easy addition and removal of units.

- Non-marking legs
- Telescopic front legs
- Fully covered non-slip footplate
- Large profile legs
- Positive new plastic clips
- Recessed pole seat
- Comfortable broad carrying strap
- OffBox Accessory pack
- Retaining strap on drawer unit

Included FREE with XS6

- 2 x Keepnet Arms
- 1 x Super Side Tray
- 1 x Double Ripple Bar

■ X4S ONBOX

A great all-round box with plenty of storage, the X4S comes with two deep (40mm) front drawers, one deep (40mm) side drawer which is divided to take Inbox winder trays and one shallow (20mm) side drawer.

- Non-marking legs
- Telescopic front legs
- Fully covered non-slip footplate
- Large profile legs
- Positive new plastic clips
- Recessed pole seat
- Comfortable broad carrying strap
- Retaining strap on drawer unit

The new OnBox XS range include advanced design features that make them stronger, lighter and easier to use. So, whatever your preference there is something in the range to suit you.

Non-Slip Platform

One piece cassette design for easy movement, covered in a non-slip finish.

Rounded Larger Profile Legs

Rounded profile legs are larger in diameter to provide much greater stability.

Clip Design

Easier to use and more secure. Does not fold under seat when closing the unit.

Base Unit

Strong plastic Base Unit with ergonomic design

The Deep Drawer supplied with the X4S and X3S OnBox models will take two Inbox Winder Trays (not supplied)

■ X3S ONBOX

The X3S comes with two deep (40mm) front drawers, one deep (40mm) side drawer which is divided to take InBox winder trays.

- Non-marking legs
- Telescopic front legs
- Fully covered non-slip footplate
- Large profile legs
- Positive new plastic clips
- Recessed pole seat
- Comfortable broad carrying strap
- Retaining strap on drawer unit

NEW

■ X3SD ONBOX

The X3SD comes with two shallow (20mm) side winder drawers, one deep (40mm) side drawer which is divided to take InBox accessory storage boxes.

- Non-marking legs
- Telescopic front legs
- Fully covered non-slip footplate
- Large profile legs
- Positive new plastic clips
- Recessed pole seat
- Comfortable broad carrying strap
- Retaining strap on drawer unit

NEW

TRANSPORTATION

Lots of gear to transport? Then you need the Shuttle.
You can load it up with all of your gear and because of the unique design it's still easy to push.

When we developed the Space Station Shuttle, we opted to start the process from scratch and come up with something totally unique and original better than what was, and still is, already available. Our first objective was to design something that was balanced when loaded. This is why the wheels have been positioned underneath the base and not at the end. This ensures greatly reduced lifting weights and pushing loads, compared to traditional seatbox trolleys and barrows, which makes it easier to use. We also wanted a system that could be loaded with everything, not just the seatbox, which is why the base is long enough to fit a carryall onto the main base.

The additional Utility Bag that hangs between the two arms is designed for clothing, pole rollers, bait – in fact anything you want, as long as it fits. You can even load your rod holdall onto the Shuttle if you want. Because the vast majority of venues have paths to walk on we have chosen solid wheels which means you will have no annoying punctures. The design of the Shuttle enables it to be quickly unloaded and dismantled to fit easily into most cars. Although called the Space Station Shuttle, it can be used to transport all Preston OnBox seatboxes and almost all other manufacturers boxes too. It's a fact of modern match angling that we carry more gear than ever before. The days of

getting to your peg in one trip were getting less and less, but with the Shuttle you can now load up everything and make one trip, where once it would have taken two or even three trips.

Loop fitting for Space Stations and other manufacturers boxes.

Straight Bar fitting for XS OnBox, XBox, XS Stations and TX Station.

NEW

■ OFFBOX UNIVERSAL TROLLEY

The new Universal Trolley is suitable for the complete OnBox range, Space Stations and other manufacturers seatboxes. Features an adjustable base load area, adjustable height solid wheels, and a carryall bar with integrated loops for securing bungee straps. Quick and easy to dismantle for transportation.

■ ONBOX TROLLEY

The OnBox Trolley can be fitted to any OnBox seatbox in seconds, without the legs of the box being removed. Once in use the weight of the box is balanced over the two puncture proof moulded EVA tyres to make transporting easy.

■ SPACE STATION / ONBOX SHUTTLE

The Space Shuttle is a specially designed barrow style tackle transporter, that has been developed to carry the Space Station, XBox and other seatboxes using the additional converter bar (supplied). The design also provides a large luggage loading area for carryalls and an additional removable Utility Bag between the handles for clothing, pole rollers etc. In addition, the Shuttle handle bar system incorporates a foam covered cross bar that can be used to support rod holdalls. Once the Shuttle is loaded, its design enables the angler to transport a complete set of tackle with ease compared to traditional seatbox trolleys. This has been achieved by positioning the wheels directly beneath the heaviest part of the loaded shuttle, giving optimum balance. The Shuttle can be quickly assembled and dismantled to fit comfortably inside most car boots.

“OffBox has practically revolutionised how anglers fish. Side trays, rests, keepnet arms and roosts that connect to seatboxes and keep everything neat and to hand. Plus Britain’s best selling pole roller range make OffBox a must have range of tackle.”

Interchangeable inserts that fit all sizes of leg systems are available for OffBox accessories

OffBox accessories offer the most comprehensive choice for anglers using seat boxes. Due to the unique nature of the insert system, OffBox accessories can also be used with just about all other manufactures’ boxes. By simply changing the insert to the correct one for the leg profile of the box, all arms, trays, pole supports, rod rests and roosts can be fitted. This insert also has another benefit, it enables OffBox accessories to rotate 360°, ideal for positioning trays and rods rests exactly where you want them.

Over the last few years the OffBox range has grown out of all recognition and now includes a massive range of accessories to cover the increasing demand. Our range of Pole Rollers is not only the most comprehensive available, it is also the best, and many of the design features are protected by patents and copyright registrations. To complement the rollers there’s also a large range of roosts and roost kits that offer great choice and convenience. Pole supports have now also become essential for many anglers and the OffBox Pole Support offers fantastic stability and because of the grooved roller support is easier to use than fixed supports. The new Pro version is set to become a massive seller.

POLE ROLLERS

Why use two rollers?

Pole Rollers - we all use them, but do we use them correctly. And why is there a current trend for using two rollers?

Pole rollers are essential for match anglers and over the years many designs have been tried. Preston were the first to design the folding tripod type roller a few years ago and since then we have refined the design and utilised lighter materials. We now have four rollers in the range, three work on the 'V' tripod design and one on a flat design. These all have extending telescopic legs for perfect adjustment on uneven banks and are locked using a cam lock clip that is quick and secure. The rollers themselves are made of a high density foam that is gentle on the pole and protects it from damage.

Why Two Rollers?

In the last few years using two rollers together has become more popular and with good reason. With anglers now fishing at longer lengths, often with very short 'up in the water' rigs, pole bounce when shipping out, even with the stiffest poles, has become a more common problem. Actually the problem isn't the pole bounce, it's the resulting tangles that occur that are the big problem and even our top consultants suffer. By using two rollers correctly positioned, pole bounce is greatly reduced and so are the tangles. Two rollers also make a massive difference when cupping in bait at longer lengths too. Which two rollers you choose to use makes very little difference and most anglers have their own preference. Even our consultants can't all agree on which is best! Looking at it sensibly,

using a Pro Flat Roller at the front gives more lateral movement than a 'V' roller. This is useful when playing a fish that runs sideways whilst unshipping. A 'V' roller at the back prevents too much lateral movement and keeps the pole in the right alignment.

The Right Position

What is more important is how you position them. The front roller must always be slightly higher than the back one. The difference doesn't have to be much but it really helps to stop the pole bumping when it leaves the rear roller. The simplest way to get the rollers in the right position (assuming you are using 14.5 metres or longer) is to set the front roller about 3 metres back from your box and the rear roller about 4 metres from the end of the pole when fully shipped back. With your top kit unshipped the pole should be at a comfortable height for you to reach. If the pole feels light when you hold the unshipped end, you need to move the rear roller back, or the front roller closer to you. Once you have the rollers roughly in the right position, ship out and see if there is any bounce as the pole leaves the rear roller. If there is you need to move the rollers closer together. This might be the rear one forward or the front one back, but when you get it correct you'll know as shipping out will be seamless. For anglers worried about transporting two rollers instead of one, there's the reassurance that all Preston rollers pack down to a compact size into their own bag and are manufactured from lightweight aluminium.

“Pole rollers – an essential for any match angler.”

PRO V ROLLER

UK's best selling V pole roller!

Based on an ultra lightweight tripod, this roller has been a huge success since its launch. Not only does it have the height adjustable features, it also has the added advantage of being able to alter the angle at which the legs are set, making any type of bankside terrain easy to cope with.

The braced tripod assembly locks securely and has drop-down leg extensions which are locked at the required height by quick release clasps. The height adjustable centre pole also locks with its own handwheel.

SUPER PRO V ROLLER

Based on the popular Pro V Roller, there are several key differences on the Super version. An extra set of internal legs enable the roller to be set higher than before. To prevent overbalancing the base of the centre section has a clip suitable for attaching a groundbait bucket or carryall making the roller more stable. The centre roller is now made in two parts to make unshipping twice as easy. The Super Pro V Roller still packs away in its own compact padded carry case.

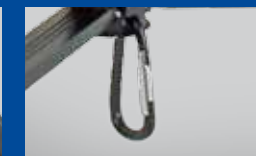

SUPER PRO V ROLLER FEATURES

Quick Lock Mechanism

Height Adjustment

Stabilising Hook

Quick Lock Leg Cam

EVA Rollers

FREEFLOW ROLLER

Manufactured with unique tapered rollers to improve its free flowing nature, whilst eliminating the danger of the pole riding up during use. Based around the same tripod as used on the hugely successful Pro V Roller, but with the added feature of a clip at the base of the upright that can be used to hold the roller steady in windy conditions by clipping to a net or rod bag. Complete with padded carry case.

PRO TRIPOD

Lightweight and very stable the Pro Tripod can take all screw fitting attachments like rod rest heads, pole rollers and pole roosts. Perfect for hard canal and man-made fishery banks. Available in two sizes both come supplied in a carrycase.

PRO FLAT ROLLER

Featuring rapid assembly design, these lightweight flat rollers come with their own compact padded bag for ease of carrying. The standard roller offers a large 500mm wide bed for positive pole location and the XL version has a width of 700mm. The adjustable legs have a maximum height of 500mm on the standard version and 700mm on the XL which will clear most bankside obstructions whilst offering a stable base.

OFFBOX POLE SUPPORT

The OffBox Pole Support has been a huge hit with match anglers. In fact once you have used one you'll wonder how you ever managed without. Not only can it be used as a rest when feeding, it is brilliant for fishing shallow for carp or when holding a bait still in moving water.

How many times have you been fishing when suddenly the wind whips up and presenting that finely dotted light carp rig in the far bank grass on a commercial becomes mission impossible? The pole starts bouncing about and presentation becomes impossible. That's when the Pole Support comes into its own. "I have also used mine on powerful rivers when fishing at World Championships level, and on matches on deep UK waterways such as the Gloucester Canal," says Des Shipp.

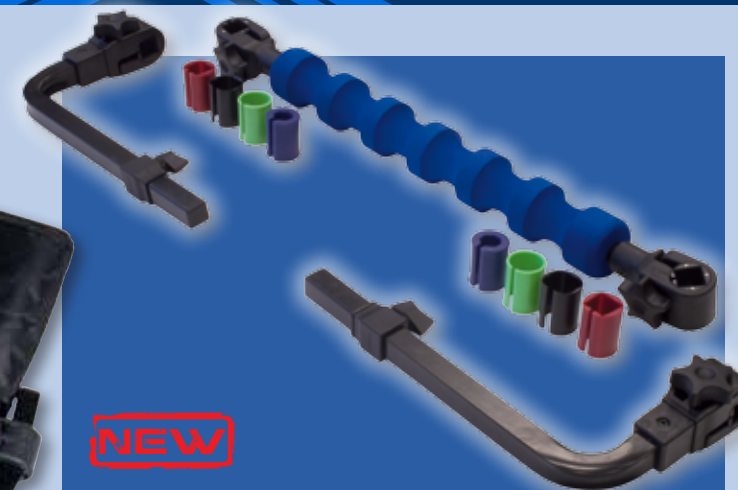

"On the Gloucester, the canal can suddenly start to tow. You adjust your pole rig, laying a few extra inches of line on the bottom but to no avail. The float starts to trip through and bites stop. "But with the Pole Support you can keep the float still and you can feed accurately, too, using the grooves in the support as a visual reference point to line up to a far bank marker. "On a hard match when you are looking for only 10 bites and have to fish at 16 metres, can you think of a better way of achieving great presentation and being able to concentrate for five hours?"

NEW

PRO POLE SUPPORT

The Pro Pole Support works on the same principle as the original Pole Support and is perfect for fishing at very long range giving hands free support. This version has longer front arms which places the roller support further away and gives more clearance at the front of the platform which allows easy access to keepnets. The roller has smaller ripples for accurate pole positioning. Come with a full set of inserts that can be changed to suit different leg profiles.

NEW

POLE SUPPORT

Designed to fit all popular leg and seatbox systems, the Pole Support is totally height adjustable making it ideal for all pole fishing applications. The support roller is ultra rigid when in use and has a profiled head which rolls – making pole positioning absolutely perfect, especially if you are fishing tight to the far bank. Makes fishing at longer lengths, for long periods, much easier and leaves your hands free for feeding. Great for positioning the pole tip just above the surface when fishing shallow and constantly feeding.

Multi-adjustable Feeder Arm Bracket allows perfect rod positioning

The XS Feeder Arm is the most stable we have ever designed.

XS FEEDER ARM

Designed around a new clamp style knuckle, the XS Feeder Arm can be fitted below the frame of your seatbox, or below other accessories. The two fixing points make this arm the most stable we have produced, whilst still remaining infinitely adjustable.

The inner tube is D sectioned in profile to completely eliminate any rotation on the arm. Complete with a full range of inserts to enable it to be used on most popular seatboxes.

BUTT REST

Designed to hold the rod butt securely whether fishing in either horizontal or vertical (due to the moulded 'lip' at the rear of the rest).

FREE FLOW ROD REST

High-sided rod rest on a FIXANGLE mechanism featuring a deep line groove allowing direct contact with your bait.

DUTCH FEEDER ROD REST

The large Dutch Feeder Rod Rest is 60cm long and has been designed to offer excellent flexibility when placing the rod. The fully padded arm protects the rod from damage. Perfect for carp feeder fishing as the rod can move freely along the rest on the bite. Available in two sizes standard or short.

TUBE ROD REST

The soft rubber tube insert and high sides hold your rod securely in place - even in the windiest conditions. The Tube Rest also incorporates 'Fixangle' ensuring that the rest remains at exactly the right angle.

QUIVER ROD REST

Special 'angle' design head enabling secure rod positioning when fishing the tip. This rod rest head comes with the 'FIXANGLE' mechanism which locks the rest into exactly the angle required.

ACCESSORY TOOL BAR

With the success of OffBox accessories we have found the need to develop our own accessory bar, because sometimes the legs of your box just aren't in the right place or, more to the point, you can't fit all the accessories you want on just the two front legs of your footplate. The new Toolbar comprises three blocks, suitable for keepnets, a pole sock or tulip grips and two to attach to your footplate. Additional Accessory Blocks are available separately so you can adapt the bar to suit your individual needs.

"The Accessory Tool Bar fits to the front legs of all OnBox systems (and most other manufacturers boxes) and increases accessory capacity. Additional Accessory Blocks are also available."

ACCESSORY BLOCK

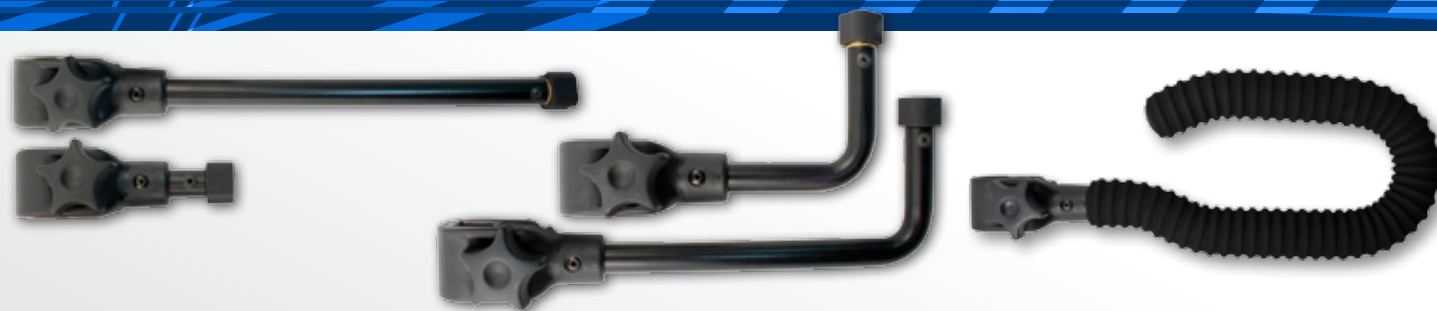

Additional Accessory Block for using on the Accessory Tool Bar. Comprises adjustable OffBox knuckle with threaded short stick for keepnets and accessories.

"Perfect for the hard banks found on many commercial fisheries, the Telescopic Feeder Arm offers excellent adjustment for perfect rod positioning."

TELESCOPIC FEEDER ARM

Fits all box leg systems. The 360° Infinite Twist connectors enable you to place your rod exactly where you want. The angle at which you have your rod to the bank and the exact height can both be adjusted exactly making the Feeder Arm perfect for hard bank venues where a conventional bankstick can't be used.

KEEPNET ARM

The Keepnet Arm can be swivelled into any position.

With integral locking nut.

Sizes: Short / Long.

CROSS ARM

The Cross Arm has a 90° bend and a standard thread. Use for keepnets and pole clips.

With integral locking nut.

Sizes: Short / Long.

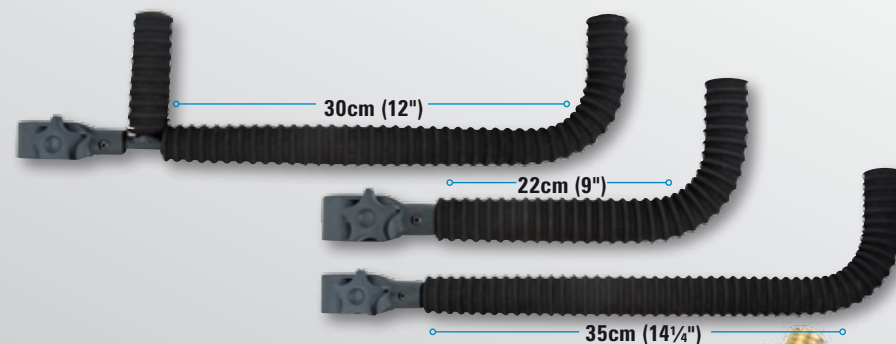

POLE HOOKS

The new Pole Hooks are designed for holding the unshipped end of your pole close to hand. Covered in a soft 'ripple' EVA foam they fit directly onto the front leg of your seatbox. Available in large or small.

RIPPLE BARS

Designed for use with rod rest heads, butt rests, 'V' pole rollers and pole section grips. Perfect for holding unused pole sections when not required.

Available as double, small or long.

BANKSTICKS

Designed especially to fit the OffBox system - handy for non OffBox attachments. Available in two sizes 200mm and 350mm.

SPACER BAR

Used to position side trays away from your box. Can also be used with all other OffBox accessories. Sizes: Short / Long.

ANGLE LOCK

Designed to be screwed into a bankstick or an OffBox arm, the Angle Tilt has a robust locking mechanism that will take any accessory with a standard thread and make it adjustable.

OFFBOX SPARES

A selection of spares - just in case you lose any of your OffBox components. The Gromit is designed for accurate positioning of items screwed onto OffBox connectors. The Inserts are for fitting OffBox to alternative leg systems.

UNIVERSAL ARMS

Will accept either round or square accessories. Brilliant for rod rests and pole roosts. Available in 3 sizes and 90° in the smallest.

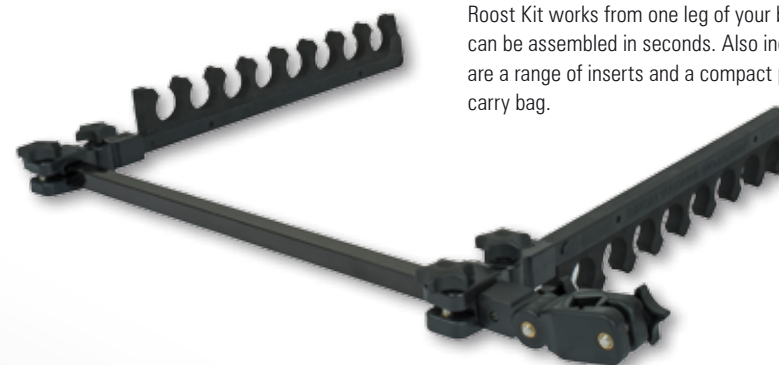

BROLLY ARM

Available in both short and long options the Brolly Arm is perfect for commercial fisheries or canals when fishing on a solid base is usually the norm and you can't get a brolly in the ground. The Brolly Arm will also accept a standard bankstick.

Sizes: Short / Long.

PRO ROOST

Designed to take up to eight top kits, the Pro Roost Kit works from one leg of your box and can be assembled in seconds. Also included are a range of inserts and a compact padded carry bag.

POLE ROOSTS

Designed to fit onto a leg system and made from EVA foam, the OffBox Pole Roosts have shaped grooves that prevent top kits from being blown off.

Available as a 6 or 8 section.

ROOST HEADS

6 and 8 section roosts. Made from soft EVA with a standard screw thread.

Available as a 6 or 8 section.

TRIPOD ROOST KIT

Supplied with one Roost Arm to fit your seatbox and an independent tripod, this system provides a stable storage solution for top kits and comes supplied in its own compact carry bag.

MEGA ROOST KIT

The Mega Roost Kit takes up to 12 top kits and comprises an adjustable tripod and a back rest with two adjustable arms with OffBox connectors and a full range of inserts to suit all leg systems. The soft EVA roost heads have specially shaped grooves to reduce the chance of top kits being blown off in the wind. Comes complete with padded carry case.

POLE SOCK

Perfect for keeping your pole close to hand and preventing it sliding forwards. The Pole Sock has a band around the neck to make location easy and prevent snagging. Fitted with a standard thread to fit onto a bank stick or OffBox accessories.

UP & OVER POLE REST

OffBox Pole Rests are new to the range. These can be used as a pair for holding the pole in place whilst feeding or balling in, or singly as a section rest.

EVA ROLLERS

High quality Pole Rollers that fit all standard and OffBox banksticks and the new Accessory Tool Bar.

Available as double, small or single.

■ BAIT TUBS

These excellent Bait Tubs have internal measuring marks for accurate bait volume checking and work well individually or as a modular unit with the Baitwaiter. Available in small, medium and large.

■ GROUND BAIT BUCKET & BOWL SET

Comprises one large mixing bucket, two smaller mixing bowls, groundbait riddle and hoop support for bowl with OffBox knuckle. Round Riddle also available as a separate item.

■ GROUND BAIT BOWL SET

Consists of one large groundbait bowl with rigid hoop with OffBox knuckle for attaching to seatbox or platform legs. Once in position it can be swivelled to the correct angle.

■ BAIT BROLLY

The OffBox Bait Brolly fits all seat box systems thanks to the OffBox connector. Height adjustable and with an additional tilt facility, the Bait Brolly keeps bait dry and out of direct sunlight. Comes supplied with a Brolly Arm.

■ SIDE TRAYS

Introduced for the angler requiring a light but strong side tray, these extremely robust trays incorporate a moulded 'lip' to keep items in place. All three sizes come with the OffBox knuckle convertors. Available in small, large and super sizes

■ BAIT WAITER WITH DOUBLE KNUCKLE

Featuring the versatile off-box knuckle system the bait waiter will fit most types of seat box. The shallow recesses will accept many combinations of our bait tubs and the other knuckle will take an additional leg to make it extra stable if required (not supplied)

■ BAIT WAITER WITH CENTRAL ATTACHMENT

Fitted with a single thread this bait waiter is ideal to use attached to an OffBox cross arm or directly to a bankstick. The shallow recesses will accept many combinations of our bait tubs.

NEW
SUMMER 2010

NEW
SUMMER 2010

“Side trays are essential to keep bait and accessories to hand. The OffBox range fits all box leg systems and offers a wide range of options”

■ SIDE TRAY SET

Three side trays in one set. The Flat Tray attaches to a square or round box leg and has a special groove so either the Deep or Shallow Tray can be slid underneath. Available as a set or purchase the shallow or deep tray separately.

■ MEGA SIDE TRAY

With a large 600mm x 400mm surface, the double-knuckled Mega Side Tray has room for a wide selection of baits, as well as accessory tackle. Supplied with a full range of OffBox inserts the Mega Side Tray adjusts to fit most seatboxes and with its telescopic support leg (supplied) creates a stable platform to store your bait. The extra support leg also enables accessories to be fitted to the far side of the tray, such as bait brollies and pole roosts. Mega Side Tray with LID
This set features an additional hinged lid that fits onto the extra support leg. Protects bait from the elements.
The lid is also available separately for anglers who already have a Mega Side Tray.

The lid is also available separately if you already own a Mega Side Tray.

■ NYLON GROUND BAIT BOWL & HOOP

Collapsible nylon groundbait bowl with solid supporting hoop. Available in two sizes, Small and Large

INBOX SOLUTIONS

The InBox range has been designed to fit perfectly into OnBox drawers. In most cases they will also fit into other box drawers too.

Hook Storage Solution

There are two hook storage options. The Magnetic Hook Box is designed to store loose hooks securely. These boxes are now available in three colours and the magnet is built into the base, so the hooks don't come into contact with it. This greatly reduces the chance of corrosion. For pre-tied hooks there are two sizes of Hooklength Retaining Boxes. These store pre-tied hooks safely and have become increasingly popular with match anglers who pre-tie their hair rigs. Each box can store different length rigs giving multiple options.

The range is completed by a small 4 Compartment

Accessory Box, great for beads, swivels and waggler adaptors and a Multi Accessory Box that's good for disgorgers and baiting needles.

Great Winders

The Pop-Up Slider Winders have a built-in anchor that slides up the winder to hold the rig. This does away with the need to use rubber anchors. The centre of the winders is offset so there is a deep side to protect the float when stored. Available in a selection of sizes and widths they are also available in trays that fit perfectly into the drawers. These trays can be stacked (2 up) in the additional OnBox Add On Units or a 40mm deep drawer, which makes better use of space.

POP-UP SLIDER WINDERS

The sliding anchor can be moved along the full length of the winder. There is a small retaining spike at both ends of the slider so it doesn't matter which way you wind your rig on. The tapered 'V' hook holding slot can accommodate hooks as small as size 26 without damage.

INBOX WINDER BOXES

The InBox Winder Boxes fit in the shallow drawers of the OnBox range enabling different rigs to be interchanged depending on requirements. Available in two sizes 13cm and 18cm in two different colours. Winders supplied in the box - 20 x 13cm winders and 14 x 18cm winders per box.

INBOX MULTI PACK

The InBox Multi Pack offers great value for money and contains a selection of InBox accessory boxes.

- 1 x Multi Accessory Box
- 2 x 4 Compartment Accessory Boxes
- 2 x 8 Compartment Magnetic Hook Boxes

Moulded hook retaining pegs

HOOKLENGTH RETAINING SYSTEM

The InBox Hooklength Retaining System has been designed to store and protect pre-tied hooks and hook lengths.

The Large InBox Hooklength Retaining System is designed to retain six different sizes of hooks/hooklength strengths, in lengths from 15cm (6") up to 60cm (24").

The ultraslim design can be stored in a drawer, under the seat or in the main compartment of a seatbox. Available in small or large.

MULTI ACCESSORY BOX

The Multi Accessory Box can be used for lots of different accessories. The removable divider creates sections suitable for baiting needles, rig bits and bombs. With the section divider removed it can be used for larger items like disgorgers, feeders and pre-tied hooks.

8 COMPARTMENT MAGNETIC HOOK BOX

The 8 Compartment Magnetic Hook Box has a strong magnet hidden in the base that holds your hooks securely and a smooth curved base to make their removal easy. Because the hooks never touch the magnet, corrosion is greatly reduced if the hooks get damp. The lids open individually and are waterproof.

4 COMPARTMENT ACCESSORY BOX

The 4 Compartment Accessory Box is perfect for all small tackle items like swivels, run beads and bait stops. The curved base makes getting fiddly items out of the compartments easy and the lids open individually so you don't end up spilling the contents of the other compartments.

PRESTON INNOVATIONS POLES

Many thought our 2009 pole range could not be beaten, but we've taken our unrivalled technology to new heights for 2010, with what we believe to be the most comprehensive Preston Innovations pole range yet.

With designs for both home and abroad, using methods used by modern match anglers, the range has been developed to satisfy everyone from England internationals like Des Shipp, who need the very best equipment to keep him at the top, to club anglers wanting quality at a really affordable price.

Unlike many companies, at Preston Innovations we actually design our own poles, specifying everything from the taper of the mandrels to the types of carbon used and the range of top kits. We are totally free to choose who we want to make our poles, which enables us to use the very best pole manufacturers in the world. Because the Preston Innovations design team are all accomplished match anglers, we have been able to design poles that are totally suited to fishing for bigger weights, using stronger elastic, to fit in with the modern carp fishing methods most prevalent in matches today. The technical expertise required is just about as advanced as it gets in carbon technology. This is one of the fundamental reasons why Preston Innovations select different manufacturers to make our different pole ranges. It might seem an obvious statement, but our pole design process, like all of our other design processes, really does start at home. For our top of the range poles we use the Italian based company Lerc for manufacture. Our association with them goes back over 13 years and they are one of the few companies we have found that not only have the technical expertise we need, they also listen to what Preston Innovations want. And listening is a very important part of our design process, because that's where it all starts. It's what we do continually, to decide what trends to follow and what UK anglers really want from a top of the range pole.

Preston Innovations consultants are continually on the bank, fishing matches on a wide range of venues throughout the country and are always on the lookout for new ideas and requirements. We also have a sales force made up of excellent match anglers. They are in daily contact with hundreds of shops and also report back to me on latest developments.

What we hear from my extended team, and what we learn from anglers, helps us to shape the direction Preston Innovations take when designing poles. Ultimately it's about giving you, the British angler, what you want and what you need. It's very difficult to satisfy all of the people, all of the time. Some want lighter poles, some stiffer poles and some stronger poles. But we have learnt over the years that there has to be a balance and compromise.

Based on the information we get, one of the most important characteristics is high performance and reliability, which is what we want from a pole too. With most match anglers now fishing for carp on match venues, at some time or other, it is essential that poles are built with enough strength to cope with larger elastics.

From the reports we hear, you all want strength, stiffness and lightness in one package. Because of our excellent relationship with Lerc, you can be sure that the Preston poles you see in the shops are exclusive to us.

We individually design each model and use our own mandrels, which for all mid to upper level poles are a full 16m design, with a continuous taper. Lots of anglers don't realise that many European poles are made on 13m and 14.5m designed mandrels with parallel extension sections.

The result of this is that at 16m the poles can start to droop significantl. We've seen some great 13m poles that just don't cut it at 16m. Preston poles that are sold at 16m are designed to be used up to their full length.

Naturally the large team of consultants we have at Preston Innovations get to have a play with their new toys too and after getting back all of the information, further modifications are made and new samples are ordered.

Some of our consultants can be quite unforgiving when playing fish. If they are happy that the poles are strong enough to cope with hard fighting fish, then so are we. If Des Shipp says it's stiff enough, we're happy. And if Tommy Pickering gives us a thumbs up, we know we've got it about as right as possible.

This process goes on for as long as is required. It's only when we are totally satisfied that everything is as good as it can be, that we will give the okay on production, safe in the knowledge that it will satisfy the requirements of anglers throughout the country.

POLE UPGRADES

Here's another first from Preston. For GiS compatible poles you can now buy just the pole (we call it a pole 'upgrade'), at a reduced price, without any kits, holdall or accessories.

If you already own a GiS compatible pole and want to upgrade to a newer model, but still want to retain all, or most, of your GiS top kits, you can now purchase a Preston Innovations 'upgrade' pole. These 'upgrade' poles have exactly the same specifications as the normal 'package' versions and come at a reduced price. You don't get any top kits, holdall, carryall or accessories but by purchasing an 'upgrade' version you can get the very best value for money by retaining your previous kits.

To buy an 'upgrade' pole contact your local Preston dealer who will supply you with the price and arrange delivery.

Pole Position with Des Shipp

When it comes to the pinnacle of pole design, the ONE pole very much lives up to its name. Compared to other poles currently available, it stands out as a true leader in terms of quality, durability and strength.

The ONE pole is the result of constant development between Preston Innovations and Lerc to produce the ultimate pole, and according to leading UK Match angler Des Shipp, the ONE is the best pole on the market.

"I'm so confident using this pole that I find it hard to imagine using anything else," says the England International. "The elastic moves in and out of the pole smoothly, whilst the pole itself is stiff, strong and quite nice on the eye, too!"

Built using the exclusive Preston Genis System, The ONE features the Nanolith carbon construction system, an anti-friction Sun Core finish and Fusion top kits which are stiffer than conventional top kits. "The ONE pole is unbeatable when fished at 16 metres, where the stiffness really comes into its own," adds Des. "I don't know how I ever got on without it."

**"...unbeatable
when fished
at 16 metres"**

THE ONE POLE

The ONE pole is the result of constant development between Preston Innovations and Lerc to produce the ultimate pole.

Using highly advanced (and expensive!) carbon, The ONE offers the ultimate in stiffness and strength.

By removing the number 1 section and elasticating the number 2 and 3 section you can use it for big elastics and carp with confidence.

Built using the exclusive Preston Genis System, The ONE features the Nanolith carbon construction system, an anti-friction Sun Core finish and Fusion top kits which are stiffer than conventional top kits.

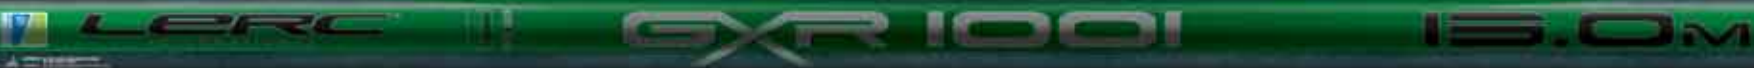

Magic Step top kits come as standard, which ensure smooth flow of elastic and work to eliminate judder, which can cause bumped fish. The ONE pole is the most advanced pole we have ever produced and is unbeatable when fished at 16 metres, where the stiffness really comes into its own.

16m Standard Pole Package

- 1 x The ONE 16m Pole
- 2 x GiS Match Plus Top 4 Kits
- 3 x GiS Power Top 2 Kits
- 1 x Short Number 4
- 1 x Kup Kit and Kups
- 1 x GiS 10 Tube Holdall
- 1 x Carryall

NEW

NEW

GXR 3000

The GXR 3000 has been manufactured using a high grade carbon for increased stiffness. This makes it an excellent pole for the serious match angler who wants a top-of-the-range pole that can do anything. Incorporating many of the features found on the most expensive Lerc poles, the GXR 3000 comes with a fantastic top kit package that includes high quality top kits which ensures the pole performs at its best in all situations and lengths.

16m Standard Pole Package

- 1 x GXR 3000 16m Pole
- 4 x GXR Match Plus Top 3 kits
- 1 x GXR Match Plus Top 4 kit
- 4 x GXR Power Top 2 kits
- 1 x Mini Extension
- 1 x Genis 10 Tube Holdall
- 1 x Kup Kit & Kups

GXR 2001

The new GXR 2001 is an upgraded version of the original 2000 model. Built on the same trusted mandrel, but using newer and more advanced materials, the GXR 2001 is stronger and stiffer and fishes superbly at its full 16m length.

The pole package offers superb value for money making the GXR 2001 one of the very best mid-priced poles available for 2010.

16m Standard Pole Package

- 1 x GXR 2001 16m Pole
- 2 x GXR Match Top 3 kits
- 5 x GXR Power Top 2 kits
- 1 x Mini Extension
- 1 x Genis 10 Tube Holdall
- 1 x Kup Kit & Kups

GXR 1500

The GXR 1500 is an amazing pole. In fact it's one of the best we have seen at its price. Featuring the latest technology and built on the same advanced taper mandrels as our top of the range poles, the GXR 1500 performs exceptionally well at all lengths, even 16m. The high value top kit package includes a good selection of match and power kits enabling the 1500 to be used in all situations.

16m Standard Pole Package

- 1 x GXR 1500 16m Pole
- 8 x GXR Match Top 3 Kits
- 1 x Mini Extension
- 1 x Genis 10 Tube Holdall
- 1 x Kup Kit & Kups

GXR 1001

The entry level GXR 1001 offers all of the features of the Genis System, and our top-of-the-range poles, at a stunning price. Using the very latest carbons available in the price bracket, the 14.5m 1001 comes with a comprehensive poles package that represents excellent value. At its full length it is stiff and well balanced and the top kits are rated to 20 elastic for security when fishing for carp.14.5m Standard Pole Package

- 1 x GXR 1001 14.5m Pole
- 2 x GXR Match Top 3 Kits
- 2 x GXR Power Top 2 kits
- 1 x Mini Extension
- 1 x Genis 10 Tube Holdall
- 1 x Kup Kit & Kups

TOP KITS

The Genis System (GiS) was developed to satisfy UK anglers who fish on a wide range of venues. Most UK anglers need a pole that can be used for carp fishing and silver fish. Whilst all of our GiS poles can take at least a 12 elastic in the match kit, more if you remove the number 1 section, there was still a demand for stronger power kits and the GiS system was developed. In very simple terms if you buy a Genis pole you have a huge range of different top kits to choose from, irrespective of the model chosen. These come in different strengths and lengths enabling you to personalise your pole to suit the exact fishing you do.

Also available are the GXR kits. These are cost effective kits, offering excellent value for money, that fit all Genis poles and come with Suncore finish.

NEW

This year sees the introduction of three new poles all aimed at the budget conscious angler.

The Carp Active, Carp-Atex and Zyrium X are robust, strong poles aimed club anglers who also want to fish for carp.

All are supplied with a match kit in the pole and at least one spare power kit with an elastic rating of 20.

■ ZYRIUM X 12.5M

NEW

The newly designed Zyrium X is an ultra strong all round pole featuring put over joints. Supplied with a match kit in the pole and a spare power kit (rated to 20 elastic), it is ideally suited for anglers new to pole fishing. The Zyrium X is robust and powerful enough to cope with all pole fishing situations and the built in strength compensates for inexperienced anglers mistakes.

Zyrium X 12.5m Standard Pole Package

- 1 x Zyrium X 12.5m
- 1 x Power Kit
- Cloth Bag

■ CARP ACTIVE 13M

NEW

The new Carp Active is supplied at 13m with two spare power kits. Manufactured from quality carbon fibre, with a strengthening cross radial construction, the Carp Active is strong, robust and well balanced making it the ideal choice for anglers wanting a good value for money all round pole.

13m Standard Pole Package

- 1 x Carp Active 13.0m
- 2 x Power Kits
- 1 x Pole Holdall

■ CARP-ATEX 16M

NEW

The Carp-atex is an extremely well balanced 16m pole, which comes supplied with a fantastic value package of three spare power kits and a pole holdall. Developed to cope with carp on commercial fisheries, rated to 20 elastic, it is also stiff and light enough for silver fish, making it the ideal choice for anglers looking for their first 16m pole.

Carp-Atex 16m Standard Pole Package

- 1 x Carp-Atex 16.0m
- 3 x Power Kits
- 1 x Pole Holdall

NEW

Ignition Poles are supplied as pole-only – this means you can choose exactly which Top kit you require.

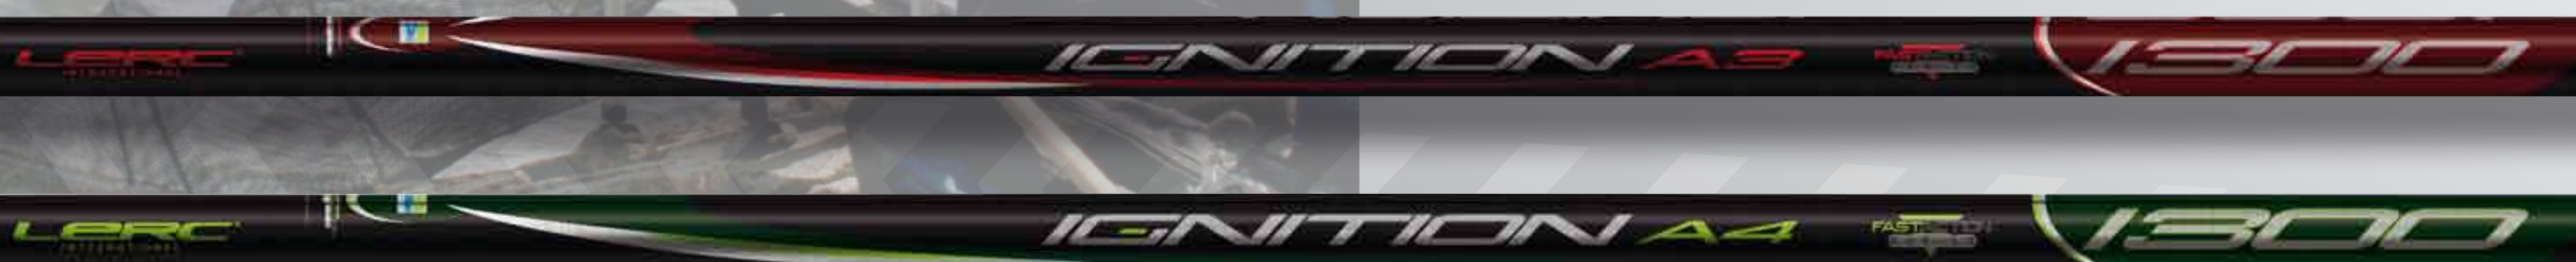

■ IGNITION A3 13M

The new Ignition A3 pole has been designed for fishing in Europe. At 13m it is the optimum length for competition fishing and features our new FastAction mandrel which increases stiffness and improves balance. Top 4 and 5 kits are available to enable you to choose exactly the top kit selection they require.

■ IGNITION A4 13M

The new Ignition A4 pole uses an even higher grade of carbon in it's production to produce a stunning 13m pole designed for European match fishing. The A4 features the new FastAction mandrel which increases stiffness and improves balance. Top 4 and 5 kits are available to enable you to choose exactly the top kit selection they require.

■ CARP MARGIN PULLA - 6.7M

Based around one of the most innovative ideas for years, the Carp Margin Pulla incorporates a Pulla top kit. This enables you to tighten the elastic when the fish is in netting range which leads to quicker netting. When using the 'Pulla' you can use lighter elastics which helps to avoid bumped fish, often associated with the heavy elastics. At 6.7m long the strong Carp Margin Pulla will not only reach the majority of margin swims with ease but in many cases the bottom of the shelf usually found at about 5 to 6m on man-made lakes. Supplied with a spare Pulla Kit.

■ UNIVERSAL PULLA KIT

The Universal Pulla Kit enables owners of 'none-Genis' poles to enjoy the benefits of the Pulla Kit. Suitable for most other current Preston poles, the Universal version features a strengthened area at the base of the section to enable it to be cut back to suit other manufacturers' poles as well

“The principle behind the Pulla Kit system is simple. Exiting from a specially designed bush in the side wall, the elastic can be held and tightened whilst playing the fish at close range.”

■ CXR400 10M / 11.5M

The CXR 400 is available in 10m and 11.5m and is ideally suited to most types of fishing including carp (elastic rating of 20) on day ticket waters and general silver fish fishing. Supplied with a mini extension and a spare top two Power Kit, the CXR400 offers excellent value for the angler on a limited budget.

CXR400

10m / 11.5m Standard Pole Packages

- 1 x CXR 400
- 1 x Power Top Two Kit
- 1 x Mini Extension
- 1 x Pole Holdall

■ CXR95 9.5M

Designed primarily for the Dutch market, where strong slim poles are used for fishing in deep harbours, these poles are brilliant for fishing line to hand with elastic, as they have a soft tip action.

They are also great for fishing for carp on man-made waters where longer lengths are not required. Essentially they are a longer version of a margin pole and offer great versatility.

CXR95

9.5m Standard Pole Package

- 1 x CXR 95 9.5M
- 1 x Power Top Two Kit
- 1 x Mini Extension
- 1 x Pole Holdall

■ CXR POWER MASTER

The CXR Power Master has been designed for fishing to hand on a wide variety of waters. This slim but very robust model is ideal for line to hand silver fish fishing in both the UK, Ireland and in Europe.

Available in a 6.8m length, an extension is available to take the CXR Power Master up to 8.0m. With an elastic rating of up to 20 it can also be used on day ticket carp waters with confidence. Supplied with an additional top two Power Kit and a protective tube.

CXR Power Margin Master 6.8m Standard Pole Package

- 1 x CXR Power Margin Master 6.8M
- 1 x Power Top Two Kit

“Cross Radial Construction is a manufacturing process that is used on Preston Carp poles. The carbon fibres are placed at different angles to optimise the wall strength and make them more robust.”

■ CXR600 11.5M / 13M

Top of the CXR range, the 600 is supremely stiff with a rapid recovery rate and anti-friction finish. It's the ideal all round pole available at both 13m and 11.5m lengths. Both are supplied with a half butt and there is an extensive range of top kits to choose from.

11.5m / 13m Standard Pole Package

- 1 x CXR 600 11.5M or 13M
- 1 x Mini Butt
- 1 x Pole Holdall

■ CXR500 11.5M / 13M

Built on the CXR mandrel the 500 has the ability to cope with a wide variety of situations due to its stiff action and anti-friction finish. Available at both 13m and 11.5m lengths. Both are supplied with a half butt and there is an extensive range of top kits to choose from.

11.5m / 13m Standard Pole Package

- 1 x CXR 500 11.5M or 13M
- 1 x Mini Butt
- 1 x Pole Holdall

■ EUROPEAN POLE SALES

The CXR 600, CXR 500, Ignition A3 and A4 are sold without a top kit package. This enables you to choose exactly what you require for the type of fishing you do.

ELASTICATION

Since we began producing pole elastic over 15 years ago there have been many changes in fishing styles and the venues, and fish anglers now regularly encounter has changed greatly.

When we first started producing elastic there was only one type available and it was restricted to a maximum of number 8 we now have no less than five different types all available in the much heavier strains required by the modern match angler.

We have no less than three sorts of standard Solid elastics, Flouro and Original Slip which have a colour coding system and the natural creamy coloured latex Solid elastics are ideally suited to most match fishing situations with there controlled stretch its easy to adjust them depending on the requirements of a particular peg be it catching roach on fine number two or playing hard fighting carp. Solid elastics are the first choice of many of our anglers when it comes to choosing a shock absorber for catching bags of small fish and at the other end of the scale many still carry a kit fitted with tight 16 for those days when you really need to boss fish away from snags on heavy gear. Since the popularity of carp fishing anglers have been looking for an edge to help them land fish quicker, when Hollow elastics came along they soon caught on to the fact that the increased stretch offered allowed them to fish small hooks with less danger of pulling out, but these soft elastics presented a new problem.

In some instances they where too soft this is when the advent of the pulla kit / bung changed the way many anglers fished small hooks and light elastics could be used allowing fish to make there initial runs with the benefit light elastics and the when fish are ready to be netted allowing the tightening of the elastic making netting fish on a top kit easy.

Des Shipp explains the advantages of doubled elastic, "To get the best of both world anglers have now started to double up light solid elastics such as 4 and 5 this gives the benefits of soft set elastic for the fishes initial run but steadily increases the pressure as the hooked fish runs, I suppose you could say a doubled 4 would give you an 8 although this is not strictly true as the way in which the pressure is applied is different and seams to subdue fish more quickly." Previously threading double elastic had been its main draw back but the addition of Preston Double Elastic makes threading this type of set up as simple as using any single strand elastic just thread it normally and then separate to give you double elastic but with out the associated headaches. We like to think that by giving such a wide range of elastics there is something to suit every situation you are likely to encounter.

“Using Hollo Elastics and Pulla Bungs enables me to fish lighter lines, and with smaller hooks”

Lee Edwards
Welsh International

Make sure your elastic works properly

To play carp correctly, with large diameter elastics over size 10, or Hollo, you need to cut your pole tip back (sometimes quite a lot) or remove the number 1 section completely. Whichever you choose to do you must make sure the tip doesn't bend too much. If it does the elastic will stick to the inside of the top section and not work properly.

How far you cut back the tip may determine which type of bush you can fit. If you cut it back a long way to make it ultra stiff, the internal diameter of the tip may be too large to fit a standard internal bush. In this case use an XLarge Internal Bush or a Slip Stretch external bush.

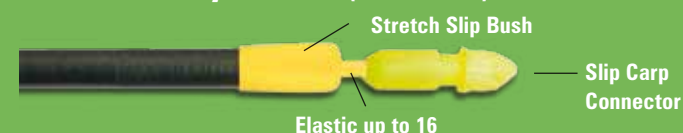

Many top anglers remove the number one section and fit an internal or external Stretch Slip Bush straight onto their number 2 section. This produces an ultra stiff tip and guarantees smooth elastic performance.

Recommended Elastic Set-ups

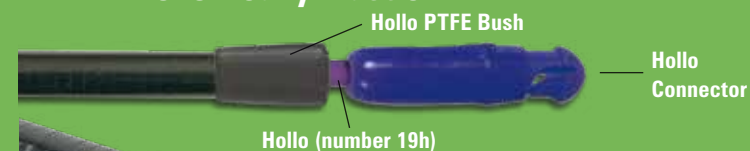

Light/Medium Elastic (external)

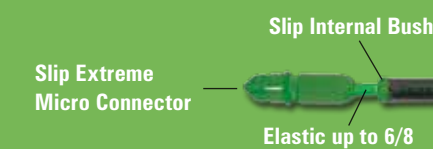

Heavy Elastic (external)

Hollo Heavy Elastic

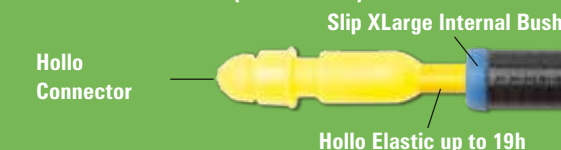

Light/Medium Elastic (internal)

Heavy Elastic (internal)

Hollo Elastic (internal)

Elasticating a Top Kit

Here's how to elasticate your top kit using an internal bush and Stora Bung.

Cut back your pole tip to match the size of the bush using a fine tooth blade. Use sandpaper to remove any sharp edges.

Check that the bush fits snugly and then smear a small amount of Araldite onto the outside of the bush and push in.

Push the uncut bung into the end of your section. Mark and cut two ribs smaller.

Thread the elastic through your top kit and attach to a Stora bung. Wind some additional elastic on the winder to enable you to adjust the tension later on.

Tie on your connector using an overhand loop. First thread the elastic through the sleeve and the hole in the connector...

... double over the elastic and tie the overhand loop. Moisten the elastic and gently tighten the knot down to the connector.

Fitting a Pulla bung

Fitting a Pulla Bung is simple and easy to do. In fact if you normally elasticate your top kits you'll be able to fit a Pulla Bung.

The Preston Pulla Bung is a brilliant way of landing hard-fighting fish more quickly than on a conventional elastic set-up. This is especially true for bonus fish that are bigger than expected.

The first thing to say is that you still play the fish as you would normally, it's only when you unship your top kit that the Pulla Bung really comes into play. From that moment on, you have the option of increasing the tension on the elastic by pulling some of it through the bung and holding it in the fingers of the hand holding the pole. By pulling some of the elastic through the bung you shorten the length of elastic still in the top kit. This reduces the distance the fish can swim away from you and makes netting much easier. But it isn't just playing bonus fish quickly that makes the Pulla Bung so useful. You can also

reduce the strength of your elastic slightly, or set it with less tension, which leads to less bumped fish, especially when fishing up in the water. Most of Preston's consultants reduce the strength of their elastic by one size. Instead of a number 12 solid elastic they use a number 10. For Hollo instead of a size 13 they reduce the elastic to a size 11.

Great For Hollo

The Pulla Bung is also brilliant for Hollo elastics because they are usually more easily stretched and being able to shorten the amount available beats fish really quickly. Still not convinced? The next time you hook a bigger than expected fish and are trying to net it on a top 4 or 5, think about how easy it would be if you had a top 2 in your hand with less elastic stretching out!

The Pulla Bung needs to fit closely to the end of the section so that the tube sticks out. First push it in as far as it will go.

Keep your nail on the bung and take it out. Mark where this is. It is important that you are accurate.

Cut through the bung one rib bigger than you think you need. You can then trim one rib at a time to achieve a perfect fit.

Attach your connector to the other end of the elastic (see page 58) and thread the elastic through the top kit and Pulla Bung.

Thread the elastic through the base sleeve and tie a knot. If you need more tension push the sleeve up and tie another knot.

■ HOLLO CONNECTORS

Colour coded to match Hollo Elastic and made from ultra strong moulded plastic, these large connectors are designed for all hollow and large size solid elastics. A snap fit on the sliding collar ensures security.

■ SLIP EXTREME & EXTRA CONNECTORS

Slip Extreme Connectors are similar to Preston Slip Connectors but have an almost fluorescent colour. Available in four different colours the Micro Extreme Connector is designed for elastics up to size 6. The Extra Carp are ultra strong and suitable for all strong elastics.

■ HOLLO ELASTIC

Using the highest quality materials and made to the strictest quality standards, results in trouble-free, consistent performance.

Available in six different strengths to suit all carp fishing situations from 9H up to a very powerful 19H. Thoroughly tested by our consultants, Hollo Elastic comes in 3m lengths in a sealed bag that ensures it stays in perfect condition. The ratings correspond to normal elastic ratings, so a 13H rating is between 12 and 14 normal elastic strength.

Due to a special manufacturing process, injecting lubricant inside the elastic is not required.

■ ORIGINAL SLIP ELASTIC

Slip Elastic was the first colour coded elastic available and is still incredibly popular. Pre-treated with Preston Slip lubricant to give outstanding abrasion resistance and reliability it is available in five metre lengths from ultra fine size 2 up to a powerful 16.

■ SLIP CONNECTORS

Manufactured to micro tolerances to ensure a perfect secure fit throughout their life. Colour coded to match Slip Elastic, Slip Connectors are available in two different sizes. Slip Micro is perfect for light and medium strength elastics up to a size 8 whilst the Slip Carp size will accommodate size 6 and above.

■ SLIP LUBRICANT

Slip Elastic Lubricant is the perfect lubricant for all Preston pole elastics. The thin liquid adheres to the elastic to form an ultra fine film that ensures smooth elastic performance. Available in 14ml and 50ml.

■ FLUORO SLIP ELASTIC

Fluoro Slip Elastic is produced from pure latex combined with special fluorescent pigments that do not affect its strength or performance. Available in 10 strengths, on five metre spools.

■ SLIP NATURAL LATEX ELASTIC

This high quality pure latex is sized in both diameter and numbers to enable the angler to make an informed comparison. Supplied on five metre spools, this elastic has a super smooth surface and consistent stretch to give the ultimate performance and reduce the number of lost fish.

■ DOUBLE ELASTIC

This Double Elastic has been developed to make the threading of the popular Double Elastic system as easy as threading single strands. Once threaded, the strands can be easily separated resulting in perfectly fitted double elastic. Available in four sizes – covering a range of diameters: D4 ø0.85mm, D5 ø0.91mm, D6 ø1.06mm and D8 ø1.25mm

■ HOLLO PTFE BUSH

Made from PTFE, the Hollo Bush provides maximum performance when used with all hollow elastics. Designed to fit all power kit tops, the wide diameter ensures elastic is released smoothly. They can also be used directly on match number 2 sections. The tapered rear of the bush prevents unnecessary tangles.

■ STRETCH SLIP BUSH EXTERNAL

Designed for strong elastics, the Slip Stretch Bush has a thin walled construction that can be stretched to fit externally over a number 2 section.

■ XLARGE INTERNAL SLIP BUSH

Designed to fit internally into the number 2 section of match kits, or wide bore power kits.

■ SLIP BUSH INTERNAL

Designed to fit inside the pole, the Slip Internal Bush is made from PTFE for friction-free performance. The small shoulder fits neatly to the end of the pole and the internal section is strong to make fitting easy.

■ SLIP PTFE BUSH EXTERNAL

Manufactured from pure PTFE, these external bushes are shaped to minimise the chance of line catching the back of the bush.

■ DIAMOND EYE THREADER

Designed with a diamond shaped eye that grips the elastic, the Preston Threader is available in an extra long length (2.1m) for long top twos.

■ MEGA STORA BUNG

Designed to be used with Hollo elastics or heavy solid elastic the Mega Stora Bung features a large winder which allows adjustments to be made by simply removing the bung and winding elastic on, or off, the bung winder.

Manufactured from lightweight plastic, the Mega Stora Bung can be easily cut to fit most top kits by following score lines around the coned part.

Available in either a Mega Stora Bung twin pack or as a single bung with an Extractor Rod.

■ STORA BUNGS

Midi Stora Bungs are designed to fit most number 2 sections whilst the larger Maxi Stora Bungs fit most number 3 sections or power number 2 kits. Both can be easily cut back to suit different diameter top kit sections. Both lightweight bungs feature a winder that holds spare elastic making adjustment of elastic tension quick and easy. Available in pairs and singles with an extractor rod, additional extractor rods are now also available in packs of two.

■ QUICK SLIP BUNGS

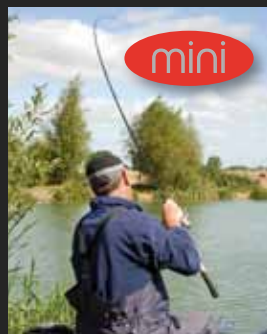

The Quick Slip Bung comprises a robust, very lightweight bung and a detachable metal extractor rod that works on a simple hook principle. Once in position, the bung does not hinder the putting together of pole sections. To remove simply locate the extractor rod into the bung and remove the bung. Available in both Midi and Big sizes to suit sections 1, 2, 3 and 4.

■ PULLA BUNG

Manufactured from lightweight plastic the Pulla Bung enables the angler to pull the elastic tighter after unshipping the top kit. The advantage is that you can use lighter elastics for small carp, but tighten it for netting if you hook a bonus fish. This means you don't need to play and net big carp on top 5s or 6s, which leads to better control, faster netting and less pole breakages.

Rod Components

Although Carbonactive rods are designed for an individual and specific purpose they have many common features.

■ ACTION

Although you can't see it, all Carbonactive rods have a non-lock action that reduces hook-pulls and lands fish more quickly.

■ HANDLE

Handles are cork with an EVA butt grip and screw down reel seat hood. We use EVA in the high grip areas as it is easier to clean.

■ REEL SEAT

The reel seat on all rods has a soft touch feel for good grip and comfort. The hood screws down to hold the reel securely.

■ FEEDER GUIDES

Feeder guides are all double-legged and low profile for strength and endurance. Low friction SiC linings are braid-friendly.

■ FLOAT GUIDES

Ultra lightweight, intermediate float guides are a single leg design for minimum impact on the action.

■ QUIVERTIPS

Quivertips are made from carbon or glassfibre depending on use. Guides on long range tips have larger diameters.

PRESTON INNOVATIONS RODS

Outstanding Quality & Innovation

The Preston Innovations Carbonactive range provides an unrivalled selection of rods design to match the needs of the modern match fisherman. Whether targeting commercial venues, rivers, canals or larger waters, Carbonactive rods are high-quality products designed to help you fish more effectively.

Since their launch many years ago, the brand has become a huge favourite with match anglers throughout the country. Designed for modern match anglers, to perform specific functions, the Carbonactive range covers just about every method used in modern fishing, from close range work on small commercial waters to extreme range feeder fishing on the most powerful European rivers.

Whichever model you choose you can be sure that it represents the very best in technology, quality and rod building innovation for its given purpose, something we believe sets the rod range apart from any other.

There are six different ranges in the Preston Innovations rod collection, with each designed for a specific purpose. Most important of all, every rod boasts a true non-lock action that reduces hook-pulls and inspires fish-playing confidence. At Preston Innovations we make things our own way. When you pick up any of our Carbonactive rods you'll notice they have their own feel and characteristics. In fact, they feel unlike any other rod you will pick up. The reason for this is that we look closely at what is needed through our team of consultants and design exactly what is required. When designing a rod we believe that you have to stick to a set of principles. For rods, the main principle is to achieve the best fish-playing actions, without compromising on the function of the rod.

One look at the Carbonactive range reveals that many of the components used are the same. This is done for a reason and that reason is one of principle. The handle and reel seat are the same for all models, because if it's correct, why change it just to be different?

We adjust the lengths to suit the different models, but they all have the same reel seats, which are made from the same material and are of the same profile. This same principle is also applied to guides. We use double leg guides on our carp feeder rods and distance rods, because they need to be able to take a lot of punishment and the slight increase in weight does not have a detrimental effect on the action.

Guides on the quivertips are also important. On our fine tips we put ultra-light guides, but on our distance feeder rods we have larger diameter guides that reduce casting friction and allow the free passage of shockleader knots. For float rods however we use lighter single leg guides because the actions would be hugely affected and weight is also a very important consideration for us.

Most importantly, the action of all Carbonactive rods is of a non-lock fish-playing type which reduces hook-pulls considerably. Although it can't be seen, this is the single biggest feature of all Carbonactive rods.

Over the following pages you can see and read about each range of Carbonactive rods and the principles behind them. Make the right choice.

MASTER

COMPETITION

EXCEL^{SERIES}

■ EXCEL 13' FLOAT

The Excel 13' is beautifully refined, light and responsive. The fine hollow tip is soft enough for the finest hooklengths and the smallest hooks and blends in perfectly to the middle section which has a mellow action for good fish-playing control. Ideal for silver fish, the Excel 13' can also be used for match sized carp.

Weight 210g · Sections 3 · Guides 15
Line rating: 2.6lb - 6lb

■ EXCEL 14' FLOAT

NEW

The new Excel 14' offers the sensitivity of the 13' model but with more line control and casting performance. This makes it perfect for both rivers and stillwaters using fine hooklengths for silver fish or up to 6lb line for carp. The fine hollow tip has a fast action that blends perfectly into the mellow actioned mid section.

Weight 220g · Sections 3 · Guides 17
Line rating: 2.5lb - 6lb

■ EXCEL 15' FLOAT

The 15' Float has all of the characteristics of the 13' version. The additional length makes it perfect for all-round river work or distance float fishing where casting performance and ultra fast line pick-up are required. The advanced blend of carbon in the blank gives the Excel 15' Float a very fast tip speed that can be used for the lightest hooklengths.

Weight 230g · Sections 3 · Guides 18
Line rating: 2.5lb - 6lb

■ EXCEL 17' FLOAT

Light and responsive, with a traditional float fishing action, plus stiffness and power in the butt and middle sections, the 17' Excel is made with just 3 sections and has a spigot joint top section. This delivers an action and a feel that is more like a 14' or 15'. Ring quantity and spacing has been carefully selected to maximise performance.

Weight 275g · Sections 3 · Guides 20
Line rating: 2.5lb - 8lb

The Excel Series provides the most advanced Carbonactive rod range. Built on technologically superior, high modulus carbon blanks, the Excel Series has been designed for anglers wanting the finesse required for silver fish methods, using light lines and small hooks. But thanks to the trademark non-lock action of Carbonactive, these rods will also land plenty of match carp.

We spoke to Stafford Moor Silver Mania champion and England International Des Shipp to find out why he rates the Excel Series so highly – a range he trusts for the majority of his fishing. “The combination of a slim ‘finesse’ profile, and balanced fish-playing power offers the ultimate performance in a wide range of situations,” smiles

Des. “The Excel Series has the refinement to handle just about anything, which is important when competition fishing.

“The float rods have more of a traditional tip action feel to them, but still adhere to the Carbonactive principle of non-lock fish-playing actions. This makes the range equally at home for carp on commercials or silver fish on more natural rivers and lakes.

“The float rods all have fine hollow tips and a fast action that improves line pick-up on the strike,” he adds. “This makes using small hooks down to size 22 and fine hooklengths of 0.09mm a safe option for roach, skimmers, bream and even chub.

“As resistance builds up, either on the strike, or when playing fish, the tip and middle section starts to work together to absorb and soften out

sudden shocks, giving added security.”

By using the correct mix of carbon materials, here at Preston Innovations we have been able to achieve a flawless action on all of the rods in the range. Including Des's favourite feeder rods.

“The feeder rods are ideal for fishing on larger venues, where you need to put a Method feeder 50-60 yards, without worrying about hookpulls due to a rod that is too stiff,” he tells us. “You can cast accurately, and catch carp and bream all day. The 12' Super Feeder is easily the best bream rod I've ever used.

“No matter which lake or species you're targeting, the Excel Series provides the answer to the majority of anglers' needs,” adds Des. “It's the ultimate all-round rod range, and with new models being added for 2010, the choice has never been easier.”

Des Shipp uses the Excel 13' Float at Docklow for carp and chub

■ EXCEL 12' SUPER FEEDER

This is a rod that can be used for many applications from bream and skimmer fishing to winter feeder and bomb fishing for carp.

Supplied with three special all carbon quivertips to cover all situations. The ultra slim gloss blank, with touches of red, looks stunning and performs equally as well in a wide range of feeder situations.

Weight 185g · Sections 3 · Guides 16
Line rating: 3lb - 6lb

■ EXCEL 11' 6" FEEDER

NEW

The new Excel 11' 6" Feeder offers versatile performance across a wide range of methods from bream fishing with open ended groundbait feeders through to match carp fishing with small and medium method feeders. Supplied with three balanced tips, the Excel 11' 6" model will cast medium feeders over 50 metres.

Weight 170g · Sections 3 · Guides 14
Line rating: 3lb - 8lb

■ EXCEL 12' 6" FEEDER

The Excel 12' 6" Feeder offers great versatility. It can handle light hooklengths thanks to the design of the tip section, which makes it an outstanding bream or river chub rod, whilst the power in the butt section really comes into its own on long casts or for controlling hard-fighting carp in a match fishing environment. Comes with three interchangeable tips.

Weight 210g · Sections 3 · Guides 15
Line rating: 3lb - 8lb

■ EXCEL TIPS

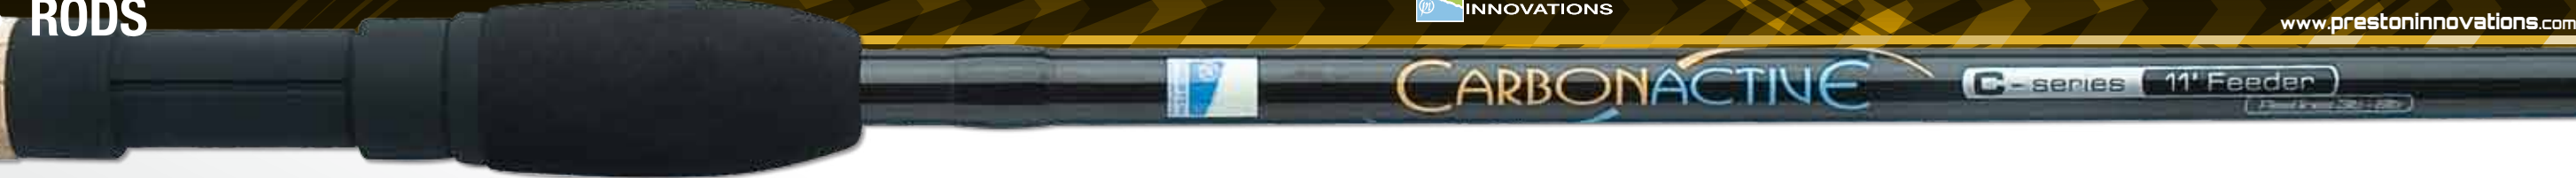

11' 6" & 12' 6" Feeder (Ø 3.5mm) Five replacement tips suitable for the 11' 6" and 12' 6" Feeder - three glass fibre and two carbon. They provide the perfect option for match anglers. Also fits Sentient and original Carbonactive rods.

■ EXCEL SUPER FEEDER TIPS
12' SUPER FEEDER (Ø 2.8MM)

There are three replacement tips suitable for the Excel 12' Super Feeder. These fine carbon tips provide bite registration - the perfect option for match anglers. Also fits Sentient and original Carbonactive rods.

All Excel Feeder rods are supplied with a Hardcase Tip Tube - excellent protection for spare quivertips.

CARBONACTIVE

C - series

■ C SERIES 11' FEEDER

A through actioned medium feeder rod suitable for short to medium range. The 11ft C Series Feeder has a non-lock blank which absorbs the lunges of large fish at the net. Supplied with three glass quivertips, to cope with different levels of tow and sizes of feeders, the 11ft C Series is also capable of casting smaller method feeders. A screw lock reel seat and high quality cork/ Duplon handle combine with the high gloss blank and lined guides to make a top class feeder rod suitable for a wide range of situations. Weight 180g · Sections 3 + 2 tips · Guides 13 Line rating: 3lb - 6lb

■ C SERIES 12' FEEDER

With its extra length and increased power, the 12ft C Series Feeder rod is suitable for medium to long-range fishing with loaded feeders up to 3oz. The spacing of the lined guides has been carefully thought out to give optimum casting distance and a smooth curve once a fish is hooked, yet do not add any unnecessary weight to the blank. The slim high gloss blank has a cork/Duplon handle that is fitted with a soft-touch quality reel seat that locks the reel to the rod securely. Weight 200g · Sections 3 + 2 tips · Guides 14 Line rating: 4lb - 8lb

The Carbonactive C Series was designed for commercial match waters where fish-playing power is required. The iconic Carbonactive action is used to its maximum effect in the C Series, allowing you to play fish hard whilst building up big weights.

Indeed, it's a rod range that has found favour with many top match anglers, including innovator and commercial fishery expert Andy Findlay, who thinks the C Series to provide the perfect compromise. "All the models are robust and can handle lots of punishment in the most demanding situations," Andy tells us. "The range is perfect for carp match fishing on commercial waters." Andy was highly involved in the development of the C Series range along with Tommy Pickering and our other leading consultants. The original design brief was for a range that could be used for almost all modern carp match fishing methods, and Andy believes Preston Innovations have definitely succeeded in achieving that premise.

"It's often a misconception that rods designed for playing hard-fighting carp have to be stiff," he says. "This is simply not true, although it is true that they can't be too soft either. "The C Series has what I call 'balanced power'. In simple terms, this means the rods have the guts to give fish stick in the middle and butt sections, whilst retaining a responsive tip section." In use, the non-lock Carbonactive action of the C Series comes into play as you increase pressure, but never actually locks up, even in extreme situations. One of the most noticeable and apparent features of the C Series is that they actually feel and look very much like 'normal' rods designed for silver fish – light, with crisp, responsive actions. It's only when you hook a fish that you realise how powerful and robust these rods are. "Hook a fish on the float rods and you immediately feel in control, whether it's a 2lb or 12lb fish, the rod's action keeps you in control. In fact, the harder the fish pulls, the more the rod works to absorb the power.

For anglers who already use the Mini Series 10' Carp, you'll find the 11' and 12' C Series Feeder models the perfect complement for fishing further out. As the C Series Feeder rods have relatively soft tips, they can cast small feeders easily, as the tip section is quite easy to compress (something that stiffer feeder rods don't do well). "The action of these rods makes it far easier to land fish quickly and the very forgiving action helps to subdue carp when they are under your feet, reducing the amount of hook-pulls," adds Andy. The guides on the feeder rods are made from a lightweight but strong metal alloy, with hard-wearing SiC linings that are suitable for braid and mono. With the exception of the final guide on the top section, all of the guides are low profile double leg versions that are designed to take the pressure of big weight catches. The 'C' of C Series stands for Commercial, and if one rod range ever lived up to its name, it's this one.

Benefits of C Series Rods:

- Designed for commercial fisheries
- Balanced blanks with finesse in the tips and fish-playing power in the middle sections
- High quality lined guides and exclusive soft-touch reel seats
- Excellent value combined with uncompromising quality
- Non-Lock carbonactive action

C Series Specifications

■ C SERIES 13' FLOAT

Manufactured from high modulus carbon, the 13ft C Series Float combines a through actioned non-lock blank with low down power to tame the increasingly large carp encountered in modern commercial fisheries. Suitable for use with lines up to 8lb and floats up to 16g, it's capable of casting all but the largest splasher waggles. As with all Carbonactive rods, the C Series Float has a high gloss blank finished with top quality guides and a cork/duplon handle with a screw lock reel seat. Weight 195g · Sections 3 · Guides 15 Line rating: 3lb - 6lb

CARBONACTIVE

mini

Our knowledge of current trends and having anglers at the cutting edge of the sport helps us stay ahead of the game. Developing new ideas, methods and tackle to help you catch more fish is one of Preston Innovations' fundamental principles. The Mini series rods are a classic example of us working closely with our consultants and developing a product that solve problems in today's match fishing world.

At the start of the current pellet waggler revolution, our consultants quickly realised that traditional 13ft waggler rods had limitations when casting accurately close to islands on commercial fisheries. A new type of rod was needed for accurate short casting and the Mini Series was developed. We use golf as an example of why shorter rods are more accurate. Typically, different clubs are used to hit the ball different distances and to different degrees of accuracy. The shorter the club, the shorter the distance, and the more accurate the shot.

This is the same for fishing rods. Feeder rods of 12' and float rods of 13' needed to be scaled down to increase the accuracy. Additionally this gives you other benefits. It's easier to cast in tight swims and netting fish nearer to the bank, because of the shorter length, reduces playing time.

Preston Innovations were the first company to recognise this trend and launched the Mini Series to fulfil a modern angling situation, something top match carp ace and experienced hand Steve Saunders says has been a Godsend for commercial match fishing.

"The Mini Series offers more casting accuracy on small and medium waters where fishing tight to features is important," he explains. "The shorter lengths and exclusive Carbonactive non-lock action combine together perfectly to offer just about the ultimate fish-playing action. Hookpulls virtually become a thing of the past."

All Mini models have slim blanks that are deceptively strong and can handle fish well into double figures or cope with big weight bagging situations.

"The Mini Series is a classic example of Preston

Innovations ability to design products to meet the specific needs of modern anglers," elaborates Steve. "Man-made match waters tend to be small and the need for accurate casting tight to features is essential. In fact, over the last couple of years getting 'tight' to an island, often within inches, can be the difference between success and failure, and there isn't anything better than the Mini Series to do it."

The fact that others have copied the innovation of the Preston Innovations Mini range is no surprise, and now short rods are an accepted part of match carp fishing.

"Another advantage of shorter rods is the ability to control fish better when playing them," Steve goes on. "The almost elastic type action of the Mini Series range gets fish under control and inspires confidence when playing fish close to the net. The shorter length actually means the fish comes to the within netting range, reducing playing time and boosting your catch results."

The Mini Series, then, proves the old adage that good things do, indeed, come in small packages.

■ MINI SERIES 11' FLOAT 2 PIECE **NEW**

With the popularity of pellet waggler fishing these two new rods are destined to be very popular. The through action provides the power required when hundred pound-plus bags are needed to win, whilst the short length aids casting accuracy. These new models have short handle lengths of 50cm (19") to make moving them around your body when playing fish easier.

Finished in smart black livery, with quality lined guides and a soft touch reel seat both models pack down into two equal pieces for easy carriage when set up.

The lighter 2-4g model is designed to be used with traditional wagglers and small pellet wagglers whilst the 4-10g model is for all pellet wagglers.

Line rating: 2-4g=3lb-8lb. 4-10g = 3-6lb

Developed to reflect the current need for shorter rods on many commercial venues, Mini Series rods are more accurate to cast and have an amazing non-lock fish-playing action.

Benefits of Mini Rods:

- Perfect for accurate casting to features
- Better for playing fish to the net. Shorter rods mean fish surface closer to the bank
- Great for tight pegs with restricted room
- Easy to carry 'made up'
- Carbonactive non-lock rod technology equals fewer lost fish

■ MINI SERIES 10' CARP **NEW**

Designed specifically for short range feeder fishing for carp on commercial match waters. At 10ft long, the Mini Carp offers better casting accuracy over shorter distances than normal feeder rods. This makes it great for casting to islands and it can handle large open and block-end feeders and medium method feeders.

The non-lock through action is perfect for playing carp even into double figures and when bagging. Packs down into two equal sections for easy transporting when set up.

Weight 170g · Sections 2 + 2 tips · Guides 12

Line rating: 3lb-8lb

■ C SERIES TIPS (Ø 3.5MM)

There are three replacement tips suitable for the Mini Series Feeder range - all made from fibre glass. They are robust and provide the perfect option for match anglers. Also fits some Sentient and original Carbonactive rods. 3/4oz, 1oz and 2oz

DUTCH MASTER

Designed primarily for the Dutch market, with the input from consultant Arnout Van De Stat, one of the best long range feeder anglers in Holland. His input on what was required has provided Preston Innovations with a unique range of distance feeder rods that we believe are second to none in Europe.

Strangely, these rods were designed from the tip back towards the butt. We first developed the correct tips, which is very important when distance casting and as you can see from the range there are different versions of tips that fit the extreme, long and medium range rods. These tips are vital in the design of each model and make the rods perform correctly in terms of distance and bite detection. Again, we have stuck to our principles of using the correct components for the job and kept a perfect fish-playing action. "When you need to go to extreme lengths to catch, you need a rod that will get you there," smiles Arnout. "I wanted a rod that could outcast my rivals and help me land more fish. That's where

the Dutch Master Series comes into its own."

As the name suggests the Dutch Master Series was developed for the Dutch long range feeder market where anglers often have to cast 100 metres or more when fishing for bream. On some flowing waters, not only is distance important but also the ability to cast big feeders with extra lead to hold bottom is also important.

Although designed as long range rods, this doesn't mean the Dutch Master models are just stiff casting machines. By carefully blending different carbons we have created rods with proper actions suitable for fishing with small hooks and light hooklengths. Admittedly this range doesn't have the same shock absorbing qualities as the Excel Series (especially in the longer/heavier versions), but it still makes best use of the Carbonactive action and in use there is more than enough action in the tip section to safely play bream and carp on stillwaters and chub and barbel on rivers.

"Some anglers may be put off by the name, thinking these rods aren't suitable for the UK," Arnout clarifies. "If you want a rod for bream fishing, you'll

not be disappointed by either the 11' 8" or the 12' 8". Both cast medium to long distances with medium groundbait feeders and have actions more suited to the UK style of bream fishing."

The Dutch Masters have low profile, large diameter guides suitable for braid. The large diameter and also the careful spacing of the guides reduces line friction, which increases casting performance. The carbon tips also have large internal diameter guides that are better than normal guides when using shock leaders as they allow smooth passage of knots.

One feature often overlooked is the spigoted joints. This keeps blank diameter down and reduces wind resistance when casting, which, in turn, improves distance.

"If you want a rod to go the distance on stillwaters or cast large feeders on rivers, I have no hesitation in recommending the Dutch Master Series," says Arnout. "These rods will get you casting further than you ever have before and enable you to out distance anglers around you when it matters most."

■ DUTCH MASTER 11' 8" FEEDER

The Dutch Master 11' 8" comes supplied with two sensitive carbon tips and is perfect for casting up to 50 metres when catching bream and skimmers.

With its softer tip action it is the ideal rod for when you have to scale down, yet still need controlled power for casting and fish-playing. Weight 175g · Sections 3 + 3 tips · Guides 13 Line rating: 3lb-6lb

■ DUTCH MASTER 12' 8" FEEDER

The original Dutch Master designed for continental style feeder fishing. Capable of easily casting up to 60 metres, whilst retaining a proper fish-playing action, enabling fish of all sizes to be retrieved from distance with the minimum of fuss. Comes with two push-in tips, medium and heavy, to cope with different levels of tow.

Weight 220g · Sections 3 + 2 tips · Guides 14 Line rating: 3lb-8lb

■ DUTCH MASTER 13' 8" FEEDER

The extra length of the 13' 8" Dutch Master Feeder, combined with a more powerful blank, gives you the capability to cast a fully loaded feeder up to 80 metres without compromising the fish-playing action. Comes with two push-in tips, medium and heavy, to cope with different levels of tow.

Weight 260g · Sections 3 + 2 tips · Guides 14 Line rating: 4lb-8lb

■ DUTCH MASTER 14' 2" 130GRM FEEDER

The 14' 2" 130g Feeder can launch feeders in excess of 100 metres and can be used with large feeders on both stillwaters and rivers. Oversized guides throughout and a slim blank profile enhance casting performance.

Weight 320g · Sections 3 + 2 tips · Guides 14 Line rating: 5lb-10lb

■ DUTCH MASTER 14' 2" 160GRM FEEDER

With all the same features as the standard 14' 2", the Dutch Master 14' 2" 160grm has a more powerful blank to make casting and fishing accurately at over 100 metres a reality for the competent angler.

Weight 330g · Sections 3 + 2 tips · Guides 14 Line rating: 5lb-10lb

■ DUTCH MASTER 13' 8" 100GRM

The extra length of the 13' 8" Dutch Master Feeder, combined with a more powerful blank, gives you the capability to cast a fully loaded feeder up to 80 metres without compromising the fish-playing action.

Weight 260g · Sections 3 + 2 tips · Guides 14 Line rating: 4lb-8lb

All Dutch Master rods are supplied with a Hardcase Tip Tube - excellent protection for spare quivertips.

CHOOSING THE CORRECT FEEDER ROD

Feeder Rods now make up a huge part of UK fishing on commercial venues. But how do you choose the right rod for your fishing? We spoke to England International Des Shipp to find out more about the types of things he looks for in his feeder fishing, to help you make the best choice.

"Traditionally, a properly designed feeder rod will be reasonably stiff for up to two thirds of its length. This is so that the rod can be used to proper a heavy weight accurately, but retain a generous amount of flexibility in the upper top section that continues into the quivertip itself for sensitivity."

"These days, however, there is more of a need for a through-actioned feeder rod on certain types of venues, and I believe Preston Innovations have got it exactly right in their range, providing a feeder rod for every circumstance."

Indeed, Des believes you should base your feeder rod choice around how you want to fish with the rod, which is just as important as considering the fish you intend on targeting.

"Think about the technique your employing. Are you Method feeder fishing? Using the Pellet Feeder? Or fishing for sensitive bites on a Quickload maggot feeder?" he asks. "You also need to take into account the range being fished, or the features being fished to."

"The choice has to be weighed between the type of fishing you're doing and the species - and size of that species - you hope to catch."

And Des points at the Mini series of rods as a great case in point, providing a totally new style of rod designed to meet the needs of modern match angling on smaller commercial venues.

"Bigger feeder rods were a nightmare on smaller

lakes, where much of the fishing is short range, casting tight to islands, reeds or far margins," he tells us. "Rods of 12ft and 13ft needed to be scaled down to increase the accuracy. Additionally this gives you other benefits. It's easier to cast in tight swims and netting fish nearer to the bank, because of the shorter length, reduces playing time."

"Preston Innovations were the first company to recognise this trend and launched the Mini Series based around a problem us match anglers were facing all the time. Now, I wouldn't go anywhere without my Mini feeder rod. I land almost all my fish now, because the action runs throughout the blank, reducing hookpulls."

More rods boasting such qualities are the C Series rods, which provide power where it's needed for commercial carp fishing.

"Both feeder rods are perfect bagging rods for carp with non-lock, through-actioned blanks and the correct guides and tips to withstand catching lots of carp," smiles Des. "The action of these rods makes it far easier to land fish quickly and the very forgiving action helps to subdue carp when they are under your feet."

In the Excel range, meanwhile, there are two distinct feeder rods, both designed with the heavy influence of our consultants. The 12ft 6ins Feeder design had a lot of input from Des Shipp. He wanted a rod for Method feeder fishing at distances of 40-60 metres on venues like

Larford and Barston lakes, which are larger type commercial fisheries.

"For this type of rod use and taking into account the big weights needed to win, I thought it important that it came with the same guides and tips that you associate with carp feeder rods," says Des. "This rod is also a superb river feeder rod for maggot or groundbait feeders."

"The 12ft Super Feeder is a completely different rod and one with finesse. It's okay for carp, but ideally suited to bream fishing and casting open end feeders. Fine carbon tips for sensitive bite indication, but with enough power in the lower blank to cast 50 metres is the perfect combination for bream anglers nationwide." Dutch Masters and Competition rods don't feature prominently in Des's own fishing, but he does think these rods have a place in the UK angler's armoury, especially on big reservoirs and rivers. "The tips is these rods are vital in the design of each model and make the rods perform correctly in terms of distance and bite detection," Des explains. "For fishing across big rivers, or chucking into deep water reservoirs, they are ideal." So there you have it, from one of the UK's most talented match anglers. Match the feeder rod to the fish you're fishing for, and the water you're fishing and you won't go far wrong.

COMPETITION

The new Competition feeder rods have been developed to cope with the pressure of catching big weights of bream on larger canals and stillwaters.

Primarily designed with European match fishing in mind, the Competition range is also perfect for reservoir fishing in the UK, and provides a progressive fish-playing action with exceptional casting performance.

Featuring high-grade full cork handles, both the 12' and 13' Competition Feeder rods are also able to cope with large feeders, helping retain accuracy when casting across large rivers and lakes.

NEW

"An ideal all-round rod, suited to a variety of feeder fishing situations."

■ 12' COMPETITION FEEDER

Designed for medium range feeder fishing, the 12' Competition feeder combines good casting performance with a smooth fish-playing action. Featuring a high grade cork handle, combined with a positive screw reel seat that really holds the reel firmly, it is supplied with two carbon tips of 2oz and 3oz. Finished with dark blue whippings and top quality stand off lined guides. Weight 210g · Sections 3 + 2 tips · Rings 8 Line rating: 4lb-8lb

■ 13' COMPETITION FEEDER

Designed for medium and long range feeder fishing, the extra length of the 13' Competition feeder generates a lot of tip speed when casting to punch feeders a long way with accuracy. Featuring a high grade cork handle, combined with a positive screw reel seat that really holds the reel firmly both come with two carbon tips a 2oz and a 3oz. Finished with dark blue whippings and top quality stand off lined guides. Weight 230g · Sections 3 + 2 tips · Rings 8 Line rating: 4lb-8lb

PRESTON INNOVATIONS FLOATS

At Preston Innovations we not only realise the importance of high quality floats but also that those qualities change with the function of the float or the species being fished for, this is why we are constantly working with our suppliers to develop new patterns to suit the constantly changing requirements of you the angler.

We have specific ranges of float which all cater to different needs. PB Inter floats have been manufactured after careful consultation with Des Shipp the range incorporates some of his favourite patterns, many suited to commercial carp fishing there are several features which are common across the range, to make tips brighter and easier to see in difficult light conditions the nylon tips have been painted as well as being coloured, the paint finish has been made tougher to lessen the effects of line damage to the floats body, we have also used high grade carbon and wire in their construction and strengthened the glue used to hold the eyes and stems in place traditional weak points on any float. Preston colours floats are an all round series of floats which cater to all different styles of fishing from deep still and moving waters down to shallow fishing on commercial venues many of the popular patterns are also available on quality ready tied rigs making them ideal for the angler for whom time is at a premium. PB Carp range is a small range for commercial carp fishing, they have dura float construction

with the glass stems fitting inside the hollow tips this makes these floats extremely strong and ideally matched to the rigours of match carp fishing as the last thing you need when you are on your way to a big weight is for your float to fail. Dura floats are just about as strong as its possible to make a float, we feel that we have been able to eliminate just about all the potential weak spots by gluing the stems inside the hollow plastic bristles, we have also completely removed eyes from the Dura patterns and used a spring which is attached to the bristle making these floats practically indestructible in use. Magic floats have been designed in conjunction with our Dutch consultants and Des Shipp who regularly fish large rivers and still waters where the delicate presentation of natural baits is required some of these are also available as pre tied rigs incorporating the highest quality components making these floats accessible to everyone even those with limited time to spend on their gear.

We also produce a large range of pellet wagglers suitable for many different situations, we have developed wagglers with loadings and unloaded designs to suit personal preferences, insert tips for when bites are shyer and super buoyancy foam wagglers with cane through to make them as strong as possible for bagging situations. The range also features some high quality peacock wagglers and wire stemmed stick floats for the traditionalists amongst you.

Oval Profile

Oval shaped bodies are the most versatile shape and can be used in lots of different conditions. They are very stable and can be held still in medium and fast flows, lifted to work the bait and turn around the body when fishing on-the-drop.

Body Down Profile

Very stable floats for stillwater and slow moving water fishing, especially in rough conditions. Depending on the size of tip and body taper this shape of float can be used for fine bloodworm fishing or for carp fishing on-the-deck.

Slim Profile

Slim bodies are usually found on smaller floats designed for on-the-drop fishing as they turn slowly and follow the line of the bait. A good shape for fine canal fishing where there is little tow and the bait needs to be lifted and worked.

PB INTER SERIES

PB INTER 1

Slim design with painted nylon tips, ideal for small baits particularly pellet and corn. Good on the drop float when fishing through the water.

SIZES AVAILABLE					
0.2g	0.3g	0.4g	0.5g	0.6g	

PB INTER 2

Slim round bodied design featuring a carbon stem and painted nylon bristle. Ideal for deeper water in calm conditions and slow moving rivers.

SIZES AVAILABLE					
0.3g	0.4g	0.6g	0.8g	1.0g	1.5g
2.0g	2.5g				

PB INTER 3

Slim round bodied design featuring a stable wire stem and painted nylon bristle. Ideal for deeper water in windy conditions and slow moving rivers.

SIZES AVAILABLE					
0.3g	0.4g	0.6g	0.8g	1.0g	1.5g
2.0g	2.5g				

PB INTER 4

Slim design with a wire stem and painted nylon tip, suitable for use with small baits like pellets and maggots in most depths of water.

SIZES AVAILABLE					
0.3g	0.4g	0.6g	0.8g	1.0g	

PB INTER 5

Wire stemmed dibber for fishing shallow or in shallow water. The wire stem gives good stability in rough conditions and cocks the float quickly.

SIZES AVAILABLE		
4 x 8	4 x 10	4 x 12

PB INTER 6

Carbon stemmed dibber for fishing shallow or in shallow water. The light carbon stem helps reduce tangles when fishing at distance.

SIZES AVAILABLE		
4 x 8	4 x 10	4 x 12

PB INTER 7

Short wire stemmed float with a painted nylon tip for fishing shallow water with small baits. Also makes a good on the drop maggot and caster float.

SIZES AVAILABLE		
4 x 10	4 x 12	4 x 14

PB INTER 8

Short carbon stemmed float with a painted nylon tip for fishing shallow water with small baits. Also makes a good on the drop maggot and caster float.

SIZES AVAILABLE		
4 x 10	4 x 12	4 x 14

“Designed in conjunction with England International Des Shipp, the PB Inter Series is a collection of some of his favourite patterns. With a distinctive paint finish and high quality carbon and steel stems, all nylon tips are painted to make them glow brightly when light shines through them.”

New for 2010, the Preston Bazzlerla Carp range contains five models that cover most modern match carp fishing. Robust glass stems, strong eyes and thick tips are all featured in this range.

PB CARP 1

A short robust float with a fibreglass stem. Ideal for shallow or margin fishing with big baits.

SIZES AVAILABLE		
4 x 10	4 x 12	4 x 14

PB CARP 2

Buoyant tipped dibber with a fibreglass stem which makes it ideal for fishing larger baits up in the water.

SIZES AVAILABLE	
4 x 10	4 x 12

PB CARP 3

Short float with a thick nylon tip and fibreglass stem. Bulbous body for holding still in windy conditions.

SIZES AVAILABLE			
4 x 10	4 x 12	4 x 14	4 x 16

PB CARP 4

Ideal for fishing up to features on snake lakes with a fibreglass stem and thick nylon bristle.

SIZES AVAILABLE			
4 x 10	4 x 12	4 x 14	4 x 16

PB CARP 5

Suitable for fishing large baits in open water, the PB Carp 5 features a thick nylon tip and fibre glass stem.

SIZES AVAILABLE			
4 x 14	4 x 16	4 x 18	1g

ORANGE

Thick topped floats ideal for fishing in shallow water next to features with bigger baits.

SIZES AVAILABLE		
4 x 10	4 x 12	4 x 14

BLUE

Cane tip and carbon stem. Versatile pattern for most baits and uses.

SIZES AVAILABLE					
0.1g	0.2g	0.3g	0.5g	0.75g	1.0g

WHITE

Stable bulbous design with a thick plastic bristle suitable for fishing with worms, corn and pellets.

SIZES AVAILABLE				
4 x 10	4 x 12	4 x 14	4 x 16	4 x 18
1g	1.5g	2g		

YELLOW

Pear shaped body with a long thick nylon tip suitable for big baits in windy conditions.

SIZES AVAILABLE				
4 x 14	4 x 16	4 x 18	1g	1.5g

BLACK

Line through dibbers with a carbon stem suitable for fishing shallow.

SIZES AVAILABLE		
4 x 8	4 x 10	4 x 12

SILVER

Nylon tip and carbon stem. For pellet, corn, maggot, caster and worm.

SIZES AVAILABLE			
0.1g	0.2g	0.3g	0.4g

PURPLE

Shaped balsa top. For all types of shallow fishing and down the edge.

SIZES AVAILABLE		
0.1g	0.2g	0.3g

PINK

Line through dibbers with a wire stem particularly suitable for fishing shallow.

SIZES AVAILABLE		
4 x 8	4 x 10	4 x 12

RED

Thick nylon tip, carbon stem. For meat, corn, cat meat and worm.

SIZES AVAILABLE			
0.1g	0.2g	0.3g	0.4g
0.6g	0.8g	1.0g	1.5g

GREEN

Long nylon tip and carbon stem. For most baits and uses.

SIZES AVAILABLE			
0.3g	0.5g	0.75g	1.0g

GOLD

Slim body with a long thick nylon tip suitable for big baits in good conditions.

SIZES AVAILABLE			
4 x 10	4 x 12	4 x 14	4 x 16

PRESTON COLOURS

The Colours range of floats is specifically designed for top match anglers. All models have either a thin, strong, carbon stem or fine wire for finesse situations and increased stability.

CARP COLOURS RIGS

The Preston Carp Colours range of rigs has been constructed using the same high quality components used by top match anglers throughout the country.

The combination of the Colours range floats, Preston barbless PR hooks and ultra strong REFLO® Power™ make these rigs perfect for commercial fisheries where strength and reliability are essential.

Full shooting instructions are printed on the reverse of the packaging and all are wound on to a Pop-up Slider winder.

PB SILVERS

Developed in collaboration with Des Shipp and Lee Edwards the Silvers range incorporates some of the tried and trusted patterns they find themselves using on the international stage each year, as the name suggests this range is especially suited to silver fish fishing on traditional venues.

◀ PB SILVER 1

The slim body down shape of this float combined with its carbon stem make it suitable for fishing with small baits on the drop in good conditions.

Finished with a high quality carbon stem and a painted plastic tip which shows up better in bright light conditions.

SIZES AVAILABLE					
0.3g	0.4g	0.6g	0.8g	1.0g	1.5g

PB SILVER 2 ▶

This float features a slim body down shape and a wire stem, making it suitable for fishing small baits in the bottom quarter or when conditions are less favourable.

Finished with a high quality wire stem and a painted plastic tip which shows up better in bright light conditions.

SIZES AVAILABLE					
0.3g	0.4g	0.6g	0.8g	1.0g	1.5g

◀ PB SILVER 3

The round Body of this float and its wire stem make it suitable for deeper water and fishing on the bottom.

Finished with a high quality wire stem and a painted plastic tip which shows up better in bright light conditions.

SIZES AVAILABLE				
0.5g	0.75g	1.25g	2.0g	2.5g

PB SILVER 4 ▶

Featuring a round body and carbon stem this float is suitable for deeper water and fishing on the bottom in good conditions.

Finished with a high quality wire stem and a painted plastic tip which shows up better in bright light conditions.

SIZES AVAILABLE				
0.5g	0.75g	1.25g	2.0g	2.5g

◀ PB SILVER 5

PB silver 5 features a slim body and painted fibre bristle these are ideal for fishing delicate baits on or just touching the bottom

Finished with a high quality wire stem and painted fibre bristle.

SIZES AVAILABLE						
0.1g	0.2g	0.3g	0.4g	0.6g	0.8g	1g

PB SILVER 6 ▶

This is a slim bodied float which is suitable for small fish on the drop or shallow its high quality carbon stem makes it suitable in good conditions.

SIZES AVAILABLE					
4 x 8	4 x 10	4 x 12	4 x 14	4 x 16	

◀ PB SILVER 7

The wire stem on this float makes it suitable for fishing shallow or on the drop when conditions require a more stable float

SIZES AVAILABLE			
4 x 10	4 x 12	4 x 14	4 x 16

NEW

PRESTON DURAFLOATS

Designed for carp fishing, Durafloats eliminate weak spots found on traditional pole floats and are the first choice for many of our consultants in bagging situations, where strength and durability is key.

DURAFLOAT 6
Great all-round float for up in the water and on the bottom. Long carbon stem with special top eye.

SIZES AVAILABLE				
4x12	4x14	4x16	4x18	1g

DURAFLOAT 7
Slim body for all-round fishing. Very good for up in the water pellet fishing. Long carbon stem with special top eye.

SIZES AVAILABLE			
4x12	4x14	4x16	4x18

DURAFLOAT 8
Classic rugby ball shape, slightly finer tips. Carbon Stem.

SIZES AVAILABLE				
4x12	4x14	4x16	4x18	1g

DURAFLOAT 9
Versatile elongated rugby ball shape. Carbon Stem. Small sizes work well when fishing shallow.

SIZES AVAILABLE				
4x12	4x14	4x16	4x18	1g

DURAFLOAT 10
Very similar to the Dura 9, the 10 has a shorter bristle making it ideal for fishing down the edge or up in the water using larger baits.

SIZES AVAILABLE		
4x10	4x12	4x14

DURAFLOAT 11
Diamond shaped body with a strong thick nylon tip suitable for big baits.

SIZES AVAILABLE			
4x10	4x12	4x14	4x16

MAGIC SERIES NEW

With their classy coloured lacquers, matt finish, long stems and larger sizes the Magic Series floats are ideal for traditional match fishing situations on a wide range of venues, especially deepwater venues with little or no flow.

MAGIC SERIES 1
For fishing deep still or slow moving water, the Series 1 offers a thick, sensitive plastic bristle and a high quality carbon stem.

SIZES AVAILABLE				
0.4g	0.6g	0.8g	1.0g	1.25g
1.5g	2.0g	3.0g	4.0g	

MAGIC SERIES 2
For fishing moving water or during adverse weather conditions, the Series 2 incorporates a thick plastic tip and high quality carbon stem.

SIZES AVAILABLE					
1g	1.5g	2.0g	3.0g	4.0g	6.0g

MAGIC SERIES 3
Perfect for where bites may come on the drop. Slim body and plastic tips to register all your shot as they settle. Fine carbon stem.

SIZES AVAILABLE					
0.2g	0.3g	0.4g	0.6g	0.8g	1.0g

MAGIC SERIES 4
For presentation of baits such as pinkies or bloodworm on still or slow moving water. Ultrafine plastic bristle and quality wire stem.

SIZES AVAILABLE					
0.2g	0.3g	0.4g	0.6g	0.8g	1.0g

MAGIC SERIES 5
Designed for deep water and line to hand fishing. Long slim body reduces tangles and offers less resistance on the strike. Plastic tip.

SIZES AVAILABLE			
0.6g	0.8g	1.0g	1.25g
1.5g	2.0g	2.5g	3.0g

MAGIC SERIES 6
For fishing still or slow moving water. Pear shaped body and long stable wire stem with a sensitive fibre tip. Large sizes are perfect for deep water roach fishing.

SIZES AVAILABLE				
0.4g	0.6g	0.8g	1.0g	1.5g
2.0g	2.5g	3.0g	4.0g	

PRESTON BAZZERLA

Preston Buzzerlas (PBs) have been used and trusted for years by Britain's top match anglers and cover a wide range of fishing styles. Made from the finest quality materials and individually checked, PBs are cracking floats that offer consistent performance.

PB19
Robust cane tip for fishing maggots and casters on the bottom. Carbon stem.

SIZES AVAILABLE		
4x12	4x14	4x18

PB20
Robust cane tip for fishing bigger baits on the bottom. Carbon stem.

SIZES AVAILABLE			
4x12	4x14	4x16	4x18

PB21
Fine cane tip with robust spring type eye. Ideal for pellets and fine presentation in rougher conditions. Cane tip carbon stem.

SIZES AVAILABLE			
0.3g	0.5g	0.75g	1g

PB22
Slim bodied float with a carbon stem and cane tip.

SIZES AVAILABLE					
3x8	4x10	4x12	4x14	4x16	4x18

PB PASTE
A robust self-cocking paste float. With an eye at the very tip, to prevent soft paste from being pulled off the hook.

SIZES AVAILABLE		
1	2	3

MAGIC MATCH RIGS

Produced to be used on natural rivers and lakes, especially European waters, but equally suitable for UK waters. Magic Match Rigs feature Preston Magic Floats, the new micro-barbed PR Competition Hooks and Preston Super Soft Slip Shot. The olivettes used are the new Preston Line Through versions. Tied to 6m of top quality mono, these rigs are suitable for a wide variety of venues and offer convenience and quality.

PRESTON WAGGLERS

There are two distinct ranges of Preston running line floats. For commercial carp waters there are pellet wagglers that are designed for fishing pellets and other large baits. Peacock wagglers and a new splasher waggler. Some of the models are loaded and some unloaded to suit anglers' preference. The 'silver fish' float range covers over 90% of the running line styles in use on rivers and lakes in the UK. All Preston floats are made from the finest materials and finished to perfection.

UNLOADED PELLET WAGGLERS

Supplied complete with a Preston adapter to make changing floats quick and easy, the Unloaded Pellet Wagglers allow you to alter the shotting according to the conditions, dotting it right down if conditions dictate.

SIZES AVAILABLE				
4g	6g	8g	10g	

POLY WAGGLERS

Made from an ultra lightweight and buoyant foam, these unloaded pellet wagglers have cane all the way through the body to make them more durable. Perfect for fishing shallow with big baits or pellets.

SIZES AVAILABLE					
2g	3g	4g	5g	6g	8g

SPLASHER WAGGLERS

Correctly loaded, these new Splasher Wagglers have a double body design that prevents the float diving too deep on the cast and increases the splash when it lands. A polycarbonate stem provides the strength required when casting continually.

SIZES AVAILABLE				
10g	12g	14g	16g	18g

WAGGLER ADAPTORS

The soft plastic Waggle Adaptor is designed for attaching loaded floats without the need for shot.

BIG FLOAT WAGGLER ADAPTORS

Designed for use with loaded splasher wagglers where locking shot aren't required. This version has a metal stem and copes well with repeated casting.

LOADED INSERT PELLET WAGGLER

Incorporating an insert, these wagglers combine the attractive splash with increased sensitivity offered by an insert. Ideal for shy fish. The loading makes them suitable for use with Preston Waggle Adaptors as no additional loading is required.

SIZES AVAILABLE		
4g	6g	8g

LOADED DUMPY PELLET WAGGLERS

Made with a dumpy body to create a splash and to help stop the float diving. The thick tip is easy to see and prevents the float diving under from false bites and line bites.

SIZES AVAILABLE		
4g	6g	8g

INSERT PELLET WAGGLERS

Incorporating an insert, these wagglers combine the attractive splash with the increased sensitivity offered by an insert. Provided with a quick change silicone adapter.

SIZES AVAILABLE		
4g	6g	8g

PRESTON WAGGLER

Designed for fishing large continental waters, the Preston Waggler come in two models - Sensitive and Distance. The smaller Sensitive model features a long carbon stem with a high visibility tip whilst the larger Distance model has a shorter stem. Both models are pre-loaded for accurate casting.

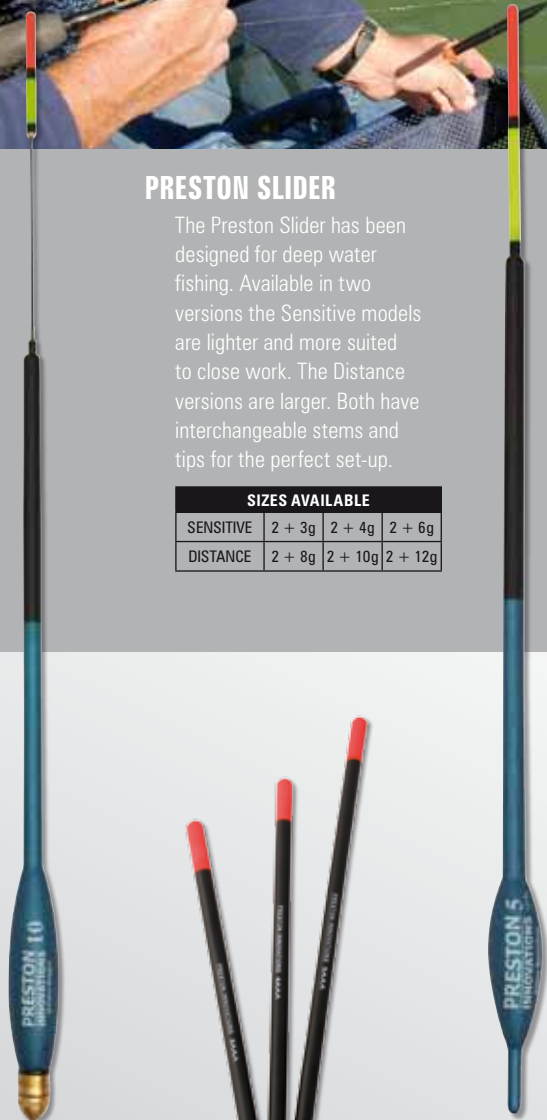

SIZES AVAILABLE			
SENSITIVE	4g	6g	8g
DISTANCE	10g	12g	14g

PRESTON SLIDER

The Preston Slider has been designed for deep water fishing. Available in two versions the Sensitive models are lighter and more suited to close work. The Distance versions are larger. Both have interchangeable stems and tips for the perfect set-up.

SIZES AVAILABLE			
SENSITIVE	2 + 3g	2 + 4g	2 + 6g
DISTANCE	2 + 8g	2 + 10g	2 + 12g

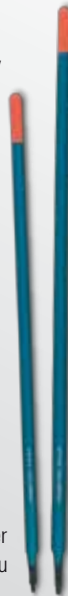

SHOULDERED STICK FLOATS

Available in 8 sizes from 4 x 4 up to 12 x 4 the Shouldered Stick Floats have a pronounced shoulder and a tapered tip. They hold back better than the Domed version and are stable which makes them excellent for deeper swims.

DOMED STICK FLOATS

Available in 8 sizes from 4 x 4 up to 14 x 4 the Domed Stick Floats have a relatively thick tip making them suitable for big baits or dragging a lot of line on the bottom. The light alloy stem makes these floats fly cleanly through the air on long casts.

INSERT PEACOCK WAGGLERS

Insert Peacock Waggler are ideal for fishing on the drop, or in harder conditions when a more sensitive approach is required. These high quality floats are made from straight peacock quill with sensible length inserts.

SIZES AVAILABLE			
2AAA	3AAA	4AAA	5AAA

THICKER PEACOCK WAGGLERS

Made from high quality peacock, these waggler are ideal for supporting bigger baits like meat when fishing up in the water. They are also perfect for fishing moving water when line needs to be laid on the bottom to slow the bait down.

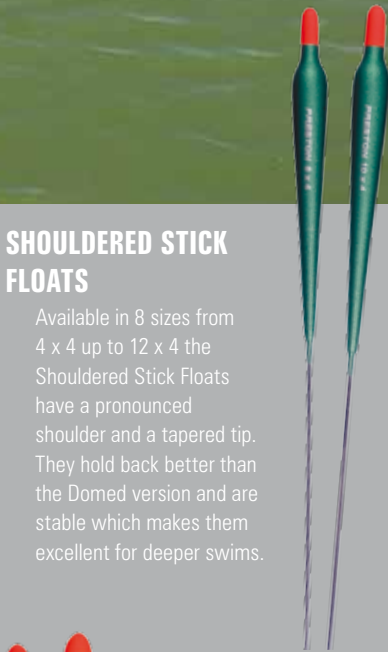

SIZES AVAILABLE				
2AAA	3AAA	4AAA	5AAA	6AAA

PEACOCK WAGGLERS

Using the best quality peacock and beautifully finished these 'arrow straight' floats are extremely well-made - a waggler is a waggler? Not quite - if you use one you might as well use a good one!

SIZES AVAILABLE				
2AAA	3AAA	4AAA	5AAA	6AAA

“Preston lines can always be trusted to perform how you expect them to, all of the time.”

Andy Findlay
Commercial Match Ace

HOOKS AND LINE

MAXIMUM PERFORMANCE AND RELIABILITY

Line choice is a very personal thing and having confidence in what you use is vital. With the vast array of lines coming onto the market there's a temptation to keep swapping and changing, but is this really the right thing to do? Most top match anglers tend to use the same line for hooklengths and pole rigs and a different line for float and feeder fishing. And from what we know, very few change.

Small Choice, Big Confidence

Preston don't have a large selection of lines to choose from, but the ones we sell are totally reliable and can be trusted to perform how you expect them to, all of the time. We know this because we thoroughly tested them before they were released and they have been around for enough years for us to know they are right.

Hooklengths

For hooklengths and pole rig lines look no further than REFLO® Power™. It's the UK's leading selling hooklength line and is also perfect for rigs which is why we sell it on 100m spools. Clear and supple, REFLO® Power™ is incredibly strong for its diameter and totally reliable. It's also a tough line that knots well and can withstand the battering it gets when catching large weights. Shots can also be moved about on it without too much detrimental effect. All things considered REFLO® Power™ offers the perfect compromise between strength, diameter and toughness. And as a testament to its performance and reliability even after being in the market place for 10 years sales are still increasing as more and more anglers come to appreciate it. Exceed has been developed as an ultra accurate hooklength and rig line its supple nature and low diameters mean its suitable for situations where more finesse is required it has been parallel spooled on to wide diameter spools to reduce the effects of line memory. Its smooth abrasion resistant properties mean that knots can be tied whilst still maintaining maximum strength and reliability. Its instant acceptance by our consultants who fish at International level just goes to prove its quality.

Reel Lines

If you already use Direct Mono you'll notice that the packaging has changed and so has the spool size. You now get 150m on each spool instead of 100m. Direct Mono is a low stretch mono (up to 50% less than some mono lines) which shows up bites better and is more direct on the strike. It isn't as instant as braid and when playing fish you won't notice much difference between normal mono and direct mono. It is a tough line too (which makes it good for feeder fishing) and doesn't require any special knots.

REFLO® XCEED

■ XCEED RIG & HOOKLENGTH LINE

Xceed is an extremely high quality, accurately calibrated, low diameter line from Japan. Extremely strong for its diameter, Xceed is soft and supple whilst offering high abrasion resistance making it perfectly suited for use as hooklengths and pole rig main lines.

0.235mm	4.361kg	9.6lb

■ DIRECT MONO

Designed for today's modern methods and with up to 50% less stretch than most mono line, Direct Mono is exceptionally good at registering bites. The controlled stretch provides much safer fish-playing than unforgiving braid, it requires no special knots to retain its strength. Perfect for all feeder and float fishing, Direct Mono really does live up to its name.

0.21mm	4.062kg	8lb 15oz

■ BRAIDCAST TAPERED MONO LEADER

Tapered mono shock leader designed to be used with braid. The mono absorbs shock, preventing crack offs and reducing hook pulls when using braid.

- 15 metre lengths allow leaders to be customised.
- 5 leaders per spool
- 0.18mm – 0.32mm (5 –12lb)

■ BRAIDCAST SUPERIOR SINKING BRAID

Braidcast has been designed especially for feeder fishing. Its awesome casting performance makes long range fishing easier and combined with the Braidcast Tapered Mono Leader hook-pulls at close range are almost totally eliminated.

- Quick Sinking Reel Line Braid
- Ultra Low Diameter
- Minimum Stretch
- Low Visibility
- 150m Spool For Distance Fishing
- Available in 0.8mm - 0.10mm

COMPETITION MATCH HOOKS

“The PR Competition range are designed for anglers who prefer to fish with a barbed hook (where fishery rules allow). Made to the same high standards as the original PR range.”

PR322

Micro barb, wide gape, crystal bend, in-turned point, fine wire. Nickel finish..

SIZES AVAILABLE					
12	14	16	18	20	22

PR311

Micro barb, wide gape, crystal bend, in-turned point, fine wire. Bronze finish.

SIZES AVAILABLE

PR HOOKS

Why is the PR36 so good?

The out-turned eye of the PR36 has been developed to improve hooking performance when using hair-rigs, the knotless knot and small hooks (size 10 and smaller).

The knotless knot is the easiest way to make a hair-rig and it produces an angle at the eye of the hook that can improve hooking performance, especially on larger hooks. But when the knot is used on smaller hooks with a straight eye, the angle is too great and this can actually impair hooking efficiency.

The point of the straight-eyed carp hook is almost at 90° to the angle of pull whereas the point of the PR36 is more in-line with the angle of pull. This is because the PR36 has a slightly out-turned eye. In fishing situations this means that when a fish picks up the bait and moves off the point is more exposed and more likely to prick the fish. Once this happens the fish bolts, or you strike, and the hook penetrates immediately.

PR HOOKS

“PR Hooks are strong and totally reliable. The first choice for many top anglers there are a wide range of styles to suit just about all match situations. When you need a good hook hold you can trust PR hooks.”

PR27

Eyed, barbless, round bend. Bronze finish.

SIZES AVAILABLE					
10	12	14	16	18	

PR36

Barbless eyed hook with out-turned eye. Ideal for hair-rigging for match carp.

SIZES AVAILABLE					
10	12	14	16	18	

PR38

Same pattern as a PR36 but with stronger wire to suit all match carp applications.

SIZES AVAILABLE					
10	12	14	16		

PR39

Same thicker wire as the PR38 but with a barb for situations where barbed hooks are allowed.

SIZES AVAILABLE					
10	12	14	16		

PR24

Barbless, in-turned point. Bronze finish.

SIZES AVAILABLE					
10	12	14	16	18	

PR29

Barbless, crystal bend, medium shank. Bronze finish.

SIZES AVAILABLE					
12	14	16	18		

PR30

Barbless, crystal bend, medium wire, bronze. Bronze finish.

SIZES AVAILABLE

PR 36 BARBLESS HAIR RIGS

Constructed using the PR36 Hook which, due to its out-turned eye, gives vastly improved presentation and hooking characteristics. Our pre-tied rigs offer the opportunity of hair-rigging to anglers of all abilities. Supplied in two sizes, 15" to suit normal feeder fishing situations and the shorter 4" version for Method feeder fishing.

Size	Strength	Diameter
10	10lb	0.25
12	8lb	0.23
14	8lb	0.23
16	7lb	0.20
18	6lb	0.18

HAIR RIGS WITH BAIT BANDS

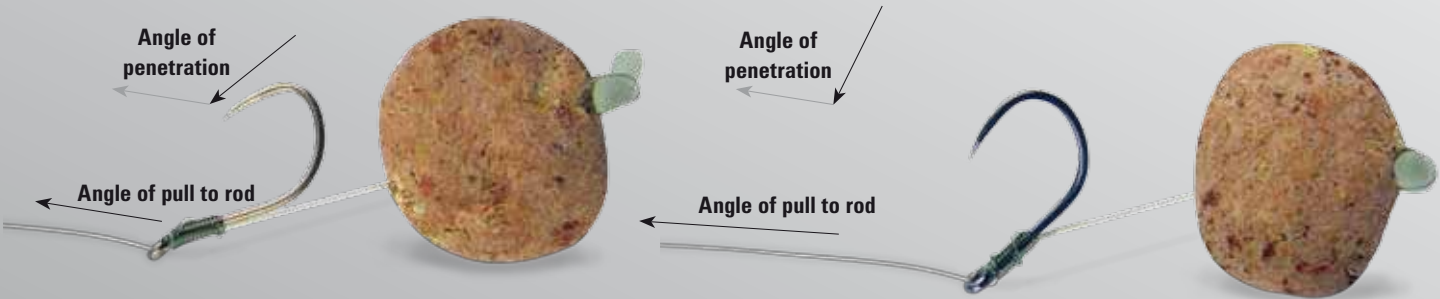

The Hair Rigs with Bait Bands are constructed using our famous PR36 barbless hook and ultra strong clear mono. The latex bait bands will stretch to accommodate most pellet sizes and can also be 'pulled' into pre-drilled pellets. Available in 4" for the Method feeder and 15" for normal feeders and pole rigs..

Size	Strength	Diameter

12	8lb	0.23
14	8lb	0.23
16	7lb	0.20
18	6lb	0.18

PR36 With Out-Turned Eye

Carp Hook With Straight eye

Hair Rigging

Barbless Hair Rigs are perfect for presenting a wide variety of baits. Here's how to mount a soft pellet.

Expertly tied straight from the packet, the hair is the correct length for a wide variety of baits.

Push a baiting needle through the pellet ready to mount on the hair. You can use the same method for boilies and sweetcorn.

Hook the baiting needle onto the loop of the hair and pull through moving the bait onto the hair.

Remove the baiting needle and insert a bait stop into hair loop. Use a bait stop that's either clear or the same colour as the bait.

Gently ease the pellet down the hair until it sits on the bait stop. This will prevent the stop falling out on the cast.

BARBED PR COMPETITION HOOKS TO NYLON

Top quality PR Competition hooks tied to REFLO® Power™. 322 and 333 are tied to 20cm (8") of line for pole fishing. 344 and 355 are tied to 80cm (32") of mono making them ideal for feeder fishing hooklengths.

PRESTON KUP SET

Supplied in packs of two different sizes, the popular Preston Kups come with two sizes of internal diameter attachments for different diameter pole sections and have brass threads.

COMPETITION SPOT ON KUP KIT

The Preston Competition Spot On Kup Kit is a lighter and stiffer version of the original model. It has the Spot On facility to instantly adjust the length of the top kit making it perfect if your power and match top kits are different lengths. Available in two sizes, with reinforced ends, to allow cutting back to suit all poles.

Comes with two Preston Kups and attachments. The attachments have two sizes of internal diameter for different diameter pole sections and have brass threads.

PRESTON COMPETITION KUP KITS

Preston Competition Kup Kits are manufactured from high quality carbon to make them as stiff as possible when cupping in bait, especially at long range. Designed with a long re-enforcement to the base of the largest section so it can be cut back as required.

PRESTON CXR KUP KIT

Preston CXR Kup Kit is designed for the CXR range of poles although the base section has a long area of reinforcing that can be safely cut back for a perfect fit on many other poles. The two-sectioned Kup Kit comes with two Preston Kups and attachments. The attachments have two sizes of internal diameter for different diameter pole sections and have strong brass threads.

FEEDAPOT

The revolutionary Feedapot has a simple elastic attachment and unique clip-on, clip-off operation that makes regular feeding quicker and easier than ever before. Due to the elastic attachment it will fit even the thickest power top kits.

CAD POTS & CARP CAD POTS

Cad Pots are designed to be left on the pole whilst fishing. They clip directly onto the top of the pole and are available in three sizes (Cad Pot Micro, Cad Pot Midi and Cad Pot Carp). Available in multiple packs with removable, aperture opening tops.

The Carp Cad Pot has a large 'keyhole' groove that will fit larger diameter power kit tops.

DRIP FEEDER POT

Made with a special dispensing neck, the Drip Feeder Pot enables you to feed small amounts regularly without the need to ship back and refill your pot. Works best with small pellets, corn and casters. Two pots per pack.

PASTE POTS

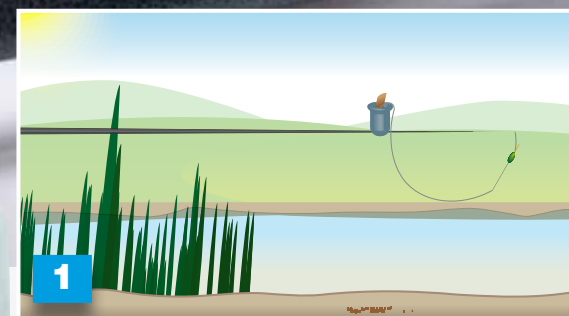

PRECISE POLE HOOKBAITING

PASTE POTS

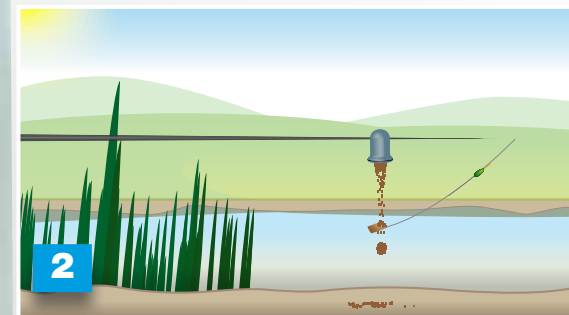

Developed in conjunction with Andy Findlay after witnessing the devastating effects of his home made versions.

They are large enough to deliver loose feed pellets and your soft paste hookbait in the required area, we have developed three different sized fittings to cope with the range of depths you are likely to encounter.

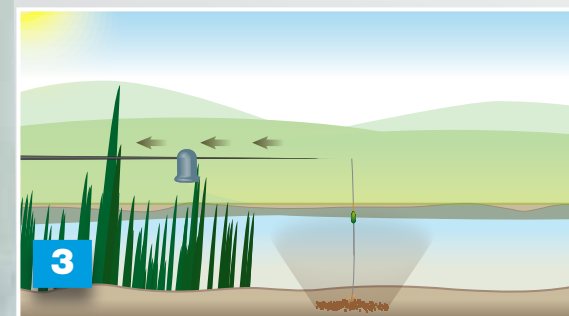

Available in three sizes: Small, Medium and Large.

Ship your pole out past the baiting area with your paste hookbait and loose feed in the pot.

Once at the desired distance, turn the pole over, allowing your rig to swing out and depositing your loose feed.

Once your rig starts to settle draw your pole back to the baited area.

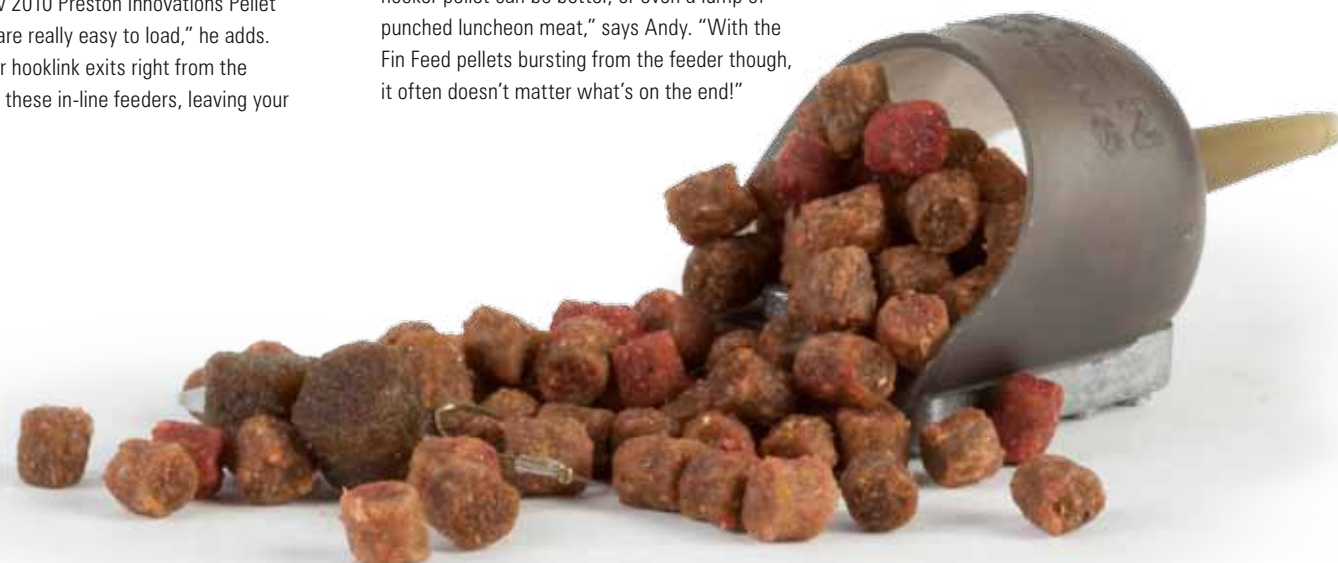

THE PELLET MASTER

When it comes to finding the best modern approach for commercial carp fishing, you need look no further than inside the mind of match ace Andy Findlay. He's the man to thank for numerous modern match fishing techniques, including the revolutionary Pellet Feeder launched by Preston Innovations in 2007.

This clever idea was based around a real Heath Robinson affair Andy created at home, to suit his needs on commercial carp venues in the UK. The idea was to present the hookbait pellet right in the centre of his feed pellets, rather than away from the feeder like when open-end feeder fishing. The Pellet Feeder has benefits over the Method feeder, too, as the hooklink cannot spring away from the feed once disturbed. "Carp love pellets," smiles Andy, "but sometimes the Method isn't the best approach to catch them, especially on waters where it is overused. "Sometimes the carp attack the feeder quite aggressively, so it's important that your hookbait is sat, right amongst the feed, so you get quicker bites. "In a match situation, you want to get as many fish on the bank as possible in the shortest period of time. The Pellet Feeder allows you to do this better than anything else. "The new 2010 Preston Innovations Pellet Feeders are really easy to load," he adds. "And your hooklink exits right from the centre of these in-line feeders, leaving your

hookbait exactly where you need it." But it's not just a case of loading in some pre-soaked pellets and casting it out anywhere. According to Andy, this is an approach where it really pays to be accurate. "When fishing the Pellet Feeder, the golden rules are to utilise your reel's line clip, be accurate, and leave the feeder where it hits bottom so that it can do its work," he explains. "I always leave the line from the quivertip to the Pellet Feeder slack. This way you can see your line bites, watching the line between the tip and the water surface, without the tip moving. "If the line was tight and a fish bumped into the line, it could move your feeder and hookbait away from the pile of pellets, which is defeating the object of the exercise. "When you get a proper bite you know about it! The tip pulls round, stays there and you simply pick up the rod because the fish is on." Watching Andy is action with the Pellet Feeder is like poetry in motion, hitting the same spot every time, waiting for the tip to go around with a hungry carp on the end. If bites do dry up, he'll try a different hookbait to ensure he's maximizing his swim. "Sometimes you can tweak the length of the short hooklink to get more takes, but other times changing from a hard pellet to a soft hooker pellet can be better, or even a lump of punched luncheon meat," says Andy. "With the Fin Feed pellets bursting from the feeder though, it often doesn't matter what's on the end!"

NEW
AUTUMN 2010

■ PELLET FEEDERS

Designed for use with pellets and short hooklengths, the clear Pellet Feeder is a direct copy of one of Andy Findlay's 'home-made' models.

Fitted with a short length of elastic, that moves through the feeder to reduce resistance on the take, and prevent hook pulls at the net, Pellet Feeders are available in two sizes.

By using a short hooklength, your hookbait sits just outside the feeder and gets surrounded by the loose pellets as they fall from the feeder.

SIZES AVAILABLE			
SMALL		LARGE	
15g	20g	20g	25g

NEW
AUTUMN 2010

■ INLINE PELLET FEEDERS

Preston Inline Pellet Feeders have been developed to use with damp pellets, using a short hooklink you can present your hookbait right amongst your feed.

Our pellet feeders feature a flat design which makes them ideal for fishing tight to islands where the dimpled lead will help them grip on the sloping margins. Their line through nature means they can be fished running or semi fixed for safety.

SIZES AVAILABLE			
SMALL		LARGE	
20g	30g	25g	40g

To make soft feed pellets, put the pellets in a bait tub and cover them in water. Leave them underwater for one minute for each millimetre the pellet is — so two minutes for 2mm, four minutes for 4mm and so on. After soaking, drain off all the water give them a shake and leave for 10 minutes, they are then perfect for putting in a pellet feeder or around a Method feeder.

Andy Findlay Tip

■ QUICK RELEASE METHOD MOULD

Developed to allow perfect loading of groundbait onto the Preston In-line Flat Method Feeder, the Quick Release Method Mould quickly forms a perfect feeder full of groundbait or pellets every time. This ensures more accurate casting due to the constant size of the loaded feeder. The release button on the bottom ensures that the feeder is ejected consistently. Designed to be used in conjunction with the Preston In-line Flat Method Feeder. Available in small, medium and large.

■ IN-LINE FLAT METHOD FEEDER

Can be used on their own or as part of a system with the Quick Release Method Mould. The flat-bottomed design makes them ideal for all situations, including casting tight to the sloping banks of an island.

The recess in the front of the feeder accepts a size ten swivel or a Preston Ring Swivel, which will provide just enough tension to make a semi-fixed rig. Alternatively they can be used with Korum Quickchange Beads to make a completely free-running rig.

SIZES AVAILABLE					
SMALL		LARGE		X-LARGE	
15g	30g	15g	30g	45g	45g

■ ELASTICATED FLAT METHOD FEEDER

Very similar to the In-Line Flat Method Feeder in both size and construction but elasticated for shock absorbing fish-playing.

The flat-bottomed design ensures they always land the correct way up with the bait at the top of the groundbait or moulded pellet ball. The light brown/translucent colour blends in with both groundbait and the bottom.

SIZES AVAILABLE					
SMALL		LARGE		X-LARGE	
15g	30g	15g	30g	45g	45g

■ RING SWIVELS

Preston Ring Swivels are ideal for use in conjunction with In-Line Flat Method Feeders to make a safe semi-fixed rig.

■ WIRE CAGE FEEDERS

NEW
SUMMER 2010

The Wire Cage Feeder features a wider lead. This offers increased stability when cast tight to islands. The ultra strong, non-glare cage construction resists damage when cast into shallow water.

The special anti-tangle feeder link helps with casting by absorbing shock.

SIZES AVAILABLE							
SMALL		MEDIUM		LARGE		X-LARGE	
20g	30g	20g	30g	25g	35g	25g	40g

■ OPEN ENDED GROUNDBAIT FEEDERS

NEW
SUMMER 2010

The Open Ended Feeder features a wider lead—for increased stability, whilst the natural camouflage colour is unobtrusive to fish.

The semi-flexible feeder link helps to reduce tangles by making the feeder stand away from the rig.

SIZES AVAILABLE					
SMALL		MEDIUM		LARGE	
20g	30g	20g	30g	20g	30g

■ QUICKLOAD FEEDERS

Quickload feeders can be filled quickly with the cap trapped on the swivel link. Cut guides on the sides make them easy to be opened out for larger particles.

Finished in an unobtrusive brown colour and with a range of different loadings these block-end feeders have a slightly oval profile.

SIZES AVAILABLE					
SMALL		MEDIUM		LARGE	
15g	20g	20g	25g	20g	25g
-	-	30g	50g	50g	70g

■ DUTCHMASTER BULLET FEEDER

Stream-lined wire cage feeders, with the loading on the base to help them cast straight, even in crosswinds. Available in two sizes and a variety of weights to suit all conditions these feeders are designed for long distance fishing.

SIZES AVAILABLE					
SMALL		LARGE		X-LARGE	
15g	30g	15g	30g	45g	45g

For fast and accurate casting every time try using a Preston Innovations Flat Inline Feeder with the Preston Innovations Quick Release Method Mould for a consistent bait presentation.

PINPOINT CATAPULT

PINPOINT CATAPULTS

Preston Pinpoint Catapults are designed for anglers who require the ultimate in accuracy and are ideal for all distances. The special soft moulded pouch ensures accurate bait grouping and the balanced handle means that you can lay the catapult on a side tray with the pouch hanging down for one-handed filling. A quick change elastic system makes swapping elastics and pouches easy.

Pinpoint Quick Change Elastic System

Pinpoint Catapult Solid Pouch
The solid pouch is particularly good for dry baits such as pellets giving tight grouping.

Spare elastic and pouches are also available.

“The Pellet Catapult has non-tangle swivelling elastic attachments and a medium elastic for accuracy.”

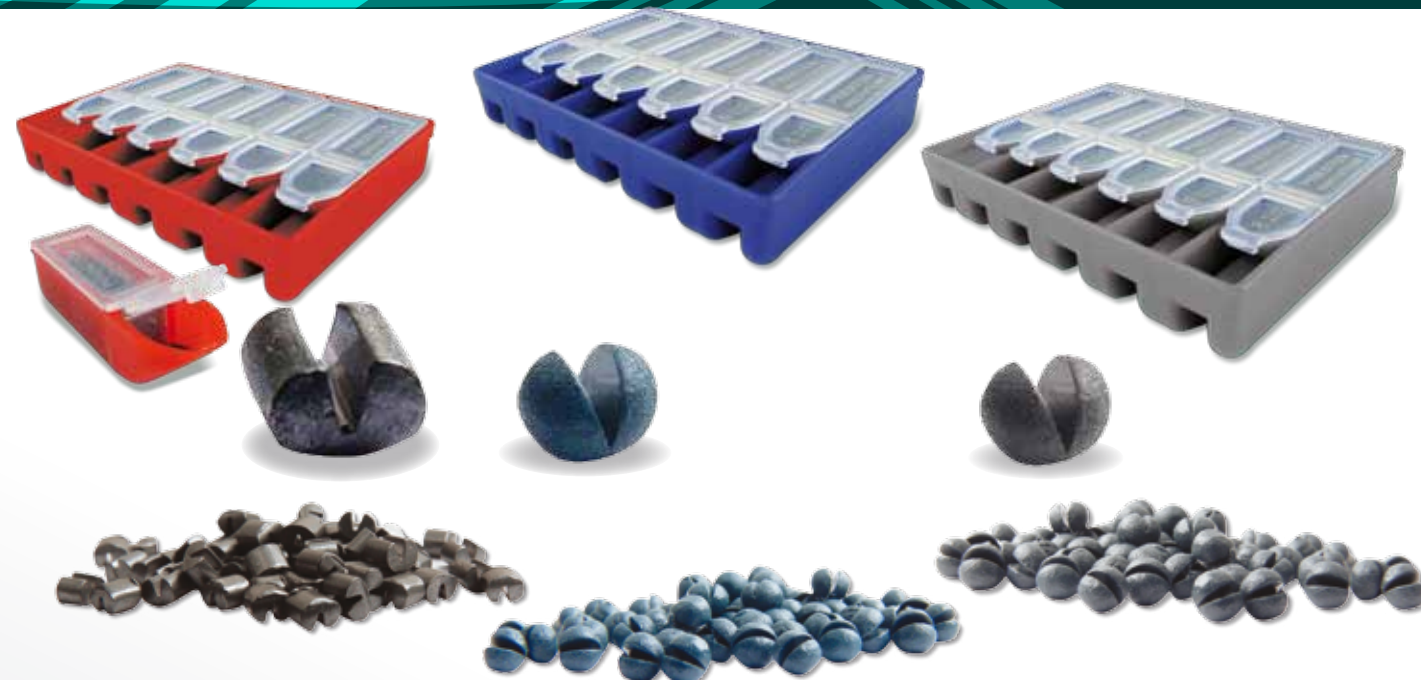

PELLET CATAPULT

Fitted with a solid pouch designed for feeding pellets of all sizes. The new Pellet Catapult has non-tangle swivelling elastic attachments and a medium elastic for accuracy.

GROUNDBAIT CATAPULT

Fitted with a large preformed groundbait pouch, swivelling elastic attachments and heavy elastic. Fires groundbait up to 50m.

STOTZ

Stotz are a hybrid shot designed for use on larger diameter lines (they also work perfectly on fine diameters too). The wide groove makes placing them on the line quick and easy. Another advantage is the increased surface area that grips the line. This prevents damage and also stops the Stotz ‘pinging’ off under stress. The flat ends of Stotz produce a neat bulk when they are grouped together.

STOTZ SIZES AVAILABLE					
8	9	10	11	12	13
8 - 11 FOUR WAY DISPENSER			13 - 8 SIX WAY DISPENSER		

STOTZ SIZES – MAINLAND EUROPE ONLY			
4	6	4 - 11	SIX WAY DISPENSER

SLIP SHOT

Slip Shot has a very thin, dark blue PTFE coating. This reduces line damage when moving the shot and also prevents the white covering that occurs over time. Accurately calibrated for consistent weight, Slip Shot are made from very soft lead and have a well-formed, central cut groove.

SLIP SHOT SIZES AVAILABLE					
8	9	10	11	12	13
13 - 8 SIX WAY DISPENSER					

SLIP SHOT SIZES – MAINLAND EUROPE ONLY					
4	6	1	BB	AA	SSG
4 - SSG SIX WAY DISPENSER					

SUPER SOFT SHOT

Accurately calibrated for consistent weight, Super Soft Shot is made from 100% lead and has a well-formed, central cut groove, which makes positioning them on both large and thin diameter lines quick and easy. The super soft lead also enables them to be moved on line with minimal damage.

SUPER SOFT SHOT SIZES AVAILABLE					
8	9	10	11	12	13
13 - 8 SIX WAY DISPENSER					

SUPER SOFT SIZES – MAINLAND EUROPE ONLY					
4	6	1	BB	AA	SSG
4 - SSG SIX WAY DISPENSER					

STOTZ

STOTTA

Developed to make the application of Stotz even easier. Designed to work with all sizes, the flat end of the Stotta allows a Stotz to be selected and applied quickly and easily. The Stotta can also be used to quickly remove Stotz without damaging your line.

NON-TOXIC SHOT

Preston Non-Toxic Shot is made from a soft dense alloy that is accurately calibrated for consistent weight. The grooves are designed to be closed with gentle finger pressure and a special recess in the top of the groove enables them to be opened easily with your fingernail.

NON-TOXIC SHOT SIZES					
SSG	AAA	BB	1	4	6
DISPENSER SSG - 6					

Preston shot is available in a wide range of sizes...

JUMBO LOCKING SHOT

Preston Jumbo Non-Toxic Locking Shot are designed for locking big wagglers. A recessed groove enables you to open them easily for positioning and re-use. Available in 2SSG and 3SSG.

■ LINE THROUGH OLIVETTES

Streamlined dense alloy olivettes, with in-line construction fitted with a soft tube insert to protect your line from damage. Available in a wide range of sizes with the size printed on the body.

SIZES AVAILABLE					
0.3g	0.4g	0.5g	0.6g	0.7g	0.8g

1.0g	1.2g	1.5g	2.0g	2.5g	4.0g

■ SLIP JOINT ALIGNERS

Pole Joint Aligners not only improve shipping together speed, they prevent the ends of pole sections getting damaged.

■ LOOP TYER

Loop tyer and disgorger comes in packs of two, supplied with full instructions.

■ DISGORGER

Plastic disgorger with two different ends. One end has traditional slot and the other a loop end for larger hooks. Choice of Small or Large.

■ JOINT RESTORER

An excellent way to build-up worn pole joints. This liquid carbon hardens with a top coat of Joint Save.

■ JOINT SAVE

Simply paint Joint Save onto joints to prevent excessive wear.

■ BRISTLE GREASE

Fluorescent coloured pole tip grease that can be applied to fine pole tips to help them sit correctly. Very useful for wire tips. 1 x Orange and 1 x Yellow per pack.

■ TOP TUBES

Designed for storing elasticated top two sections safely. Top Tubes are convenient and make best use of space. The specially designed elastic protector and end cap ensure that elastics are not damaged. Pat. pending. Design rights enforced.

■ POLE END PROTECTORS

Designed to protect pole end sections during transit. Available in a range of sizes to fit all larger pole sections, Pole End Protectors can also be left in place during fishing. Available in 38, 40, 42.5, 45 and 48mm.

■ PLUMMET

Large diameter top hole and grooved body for line location. Non-toxic alloy with flat cork base for accurate plumbing. Available in two sizes: 14g and 18g.

■ MICRO SILICONE

Ultra fine, high performance silicone tube. Will fit the finest wire and carbon pole stems. Available in mixed, 0.25, 0.40 and 0.50mm

■ POLE FLOAT SILICONE

High performance fine diameter silicone tube for thicker bristles and stems. Available in two sizes, thick and stick float.

■ QUICK BANDER

Makes baiting up using bait bands quick and easy. Can be used to attach bait directly to the hook or hair.

NEW

■ BAIT BANDS

High quality latex bait bands in three sizes to cover almost all bait sizes. 100 per pack. Available in Micro, 3.2mm, and 4.8mm sizes.

■ JOINT PROTECTOR

Designed for pole joint protection, Joint Protector is clear, lube impregnated shrink tube that can be placed on pole joints to keep them in perfect condition. Available in three sizes 4th, 5th and 6 section.

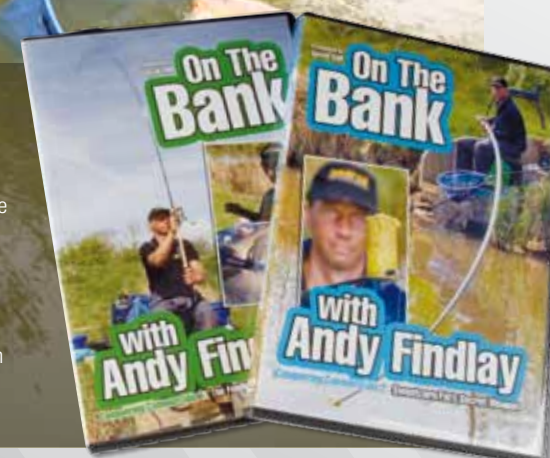

■ WINDER ANCHORS

Preston Innovations Pole Winder Anchors are produced from high quality rubber that not only stretches well but also lasts a long time.

■ PRESTON DVDS

Filmed with top match angler and Preston Innovations consultant Andy Findlay, at the prolific Glebe complex, this informative series is presented by Match Fishing magazine publisher David Hall. Packed with action and informative tips, the DVDs go behind the tactics of one of the country's best commercial carp match anglers and reveal all of his methods in intimate detail.

Preston Innovations produce a comprehensive range of high quality fish-friendly landing nets and keepnets to suit all match situations. There's also a wide choice of very strong, re-designed quality carbon landing net poles, to complement the heads in both take-apart and telescopic versions.

NEW

■ DRAIN DRY EVA BAG

New for 2010 the Drain Dry EVA Bag accommodates three keepnets and a couple of landing nets with ease. Its innovative carrying design gives you opportunity to drain water from the bag whilst on your way back to the car, this helps reduce the weight and the amount of smelly water you take home with you then by standing it up right you have a 100% waterproof bag which keeps the inside of your car boot dry after a day on the bank.

Simply turn the bag through 180° to drain-dry your nets after use.

NEW

■ COMPETITION CARP HANDLE

Carp Competition handles are manufactured from high modulus carbon with a strengthening wrap to make these handles ideal for match carp fishing, the threads are both glued and pinned to offer extra strength and durability and they are finished in an anti friction finish to make sure they slide easily through your hands, available in 2.7m and 4m lengths.

■ COMPETITION HANDLES

Premium grade take-apart landing net handles available at two lengths. The new lightweight Competition handles are slim and easily manoeuvred, whilst still being strong enough to deal with carp fishing. The thread is glued and pinned for extra security to help ensure that these handles won't let you down. The 4.4m handle is excellent for silver fish match anglers who want more reach.

"This Competition range are light and slim and come in Match and Carp versions. All threads are pinned and glued for extra security."

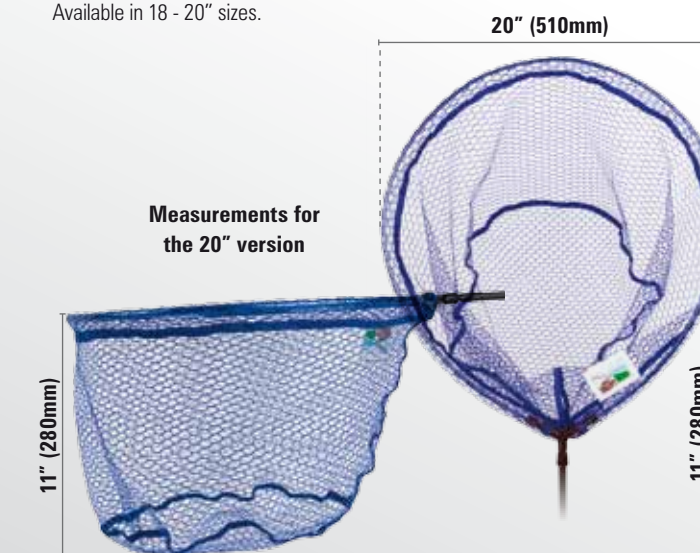

■ QUICK DRY LANDING NET

Manufactured from a strong square profile frame, the Quick Dry Landing net is attached on the inside of the frame making it neater and easier to pass through the water. The large mesh aids manoeuvrability and the depth of the net is ideal for match sized carp. Available in 18 - 20" sizes.

■ HAIR NET II

Manufactured with a strong square profile frame with the mesh attached to the inside of the frame making it neater and easier to pass through the water. The fine nylon mesh makes it suited to hair rigging because your hair won't pass through. This net is also perfect for traditional silver fish fishing. Available in 18 - 20" sizes.

■ SHALLOW LATEX LANDING NET

Suitable for match carp fishing, the Shallow Latex Landing Net features a strong 'D' profile frame and latex coated mesh which is tougher and more robust than standard mesh. The open mesh design makes this net very manoeuvrable in water and its shallow depth makes unhooking fish quick and easy.

- Shallow design for easy fish unhooking
- Latex coated hard-wearing mesh
- Oval shaped base to cradle fish
- Strong D profile frame
- Large diameter mesh allows easy manoeuvrability through the water

Available in 18 - 20" sizes.

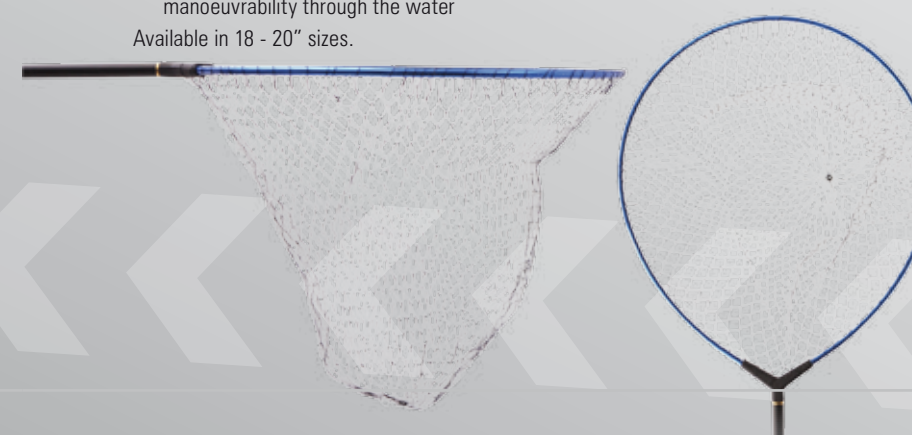

■ LATEX TILT LANDING NET

A shallow latex coated net, with widely spaced holes in the mesh. The strong 'D' profile frame has a tilted spreader block which makes this net ideal for fast netting of small fish.

Specifications

- Tilted spreader block for quick netting
- Latex coated hard-wearing mesh
- Oval shaped base to cradle fish
- Strong D profile frame
- Large diameter mesh allows easy manoeuvrability through the water

Available in 20" sizes.

NEW

■ SUPER LITE SPOON LANDING NET

The Super lite Spoon Landing Net is a lightweight net designed for Europe. The tough nylon mesh has large diameter mesh for manoeuvrability in the water and a D profile aluminium frame increases strength and stiffness. Available in 45 and 50cm.

■ LATEX 4M COMPETITION KEEPNET

The Latex Keepnet has external rings and a tough latex mesh to cope with the large catches. The square rings prevent the net from rolling when used in flowing water and the 4m length is perfect for high banks. Supplied in a carry case.

NEW

■ QUICK DRY KEEPNET

Manufactured from a mesh that holds much less water than other mesh nets which enables them to dry out much quicker after use. Also very useful on flowing water as the mesh offers less resistance to the flow. All hoops have tough corner guards for protection.

Available in 3m or 3.5m

■ BLUE CARP KEEPNET

Available in 3m, the Blue Carp Keepnet is made from ultra soft material that conforms to commercial fishery requirements. Top ring 50cm x 40cm. Comes in its own carry bag.

■ 3M BLUE KEEPNET

Manufactured from blue micro mesh, this 3m long rectangular keepnet features a positive Fixangle attachment and Preston branding around the top ring.

NEW

■ SILVER KEEPNET

Made from ultra soft material that conforms to all fishery regulations, the Silver Keepnet is a multi-purpose net designed for silver fish. Top ring 45cm x 35cm. Comes in its own carry bag.

Available in 2.5m

■ MATCH COMBO

An innovative commercial Match Combo option that includes a 3m Blue Carp and 2.5m Silver net supplied together in a two-sectioned carry bag. Perfect for match anglers who need two nets for commercial waters.

■ 50" FLAT BACK BROLLY

Based on the legendary Flat Back Brolly. This 50" Flat Back design, for added stability, now comes with a 210D waterproof nylon cover with taped seams. Now lighter, but just as waterproof as its predecessor.

- Waterproof taped seams
- Pegging points
- Angle tilt
- Pegs supplied
- Storage sleeve

■ 50" FLAT BACK BROLLY WITH ZIPS

A lightweight Flat Back Brolly fitted with two zips in the cover to enable convenient shipping of your pole.

- Waterproof taped seams
- Pegging points
- Angle tilt
- Pegs supplied
- Storage sleeve

"The 50" Flat Back Brolly With Zips features a zip either side for convenient pole shipping."

NEW

■ 50" FIBREGLASS FLAT BACK BROLLY

Based on the legendary Flat Back Brolly, this new version has lighter fibreglass arms and a 210D waterproof nylon cover with taped seams.

- Lightweight fibreglass arms
- Waterproof taped seams
- Pegging points
- Angle tilt
- Pegs supplied
- Storage sleeve

PRESTON INNOVATIONS LUGGAGE

...TAKING IT ALL WITH YOU

You can always be sure that the Preston Innovations logo stands for quality and reliability, and you only have to visit a commercial match fishery to see just how strong our brand presence is on the bank. And one area where we have excelled in 2010 is with the Preston Innovations luggage range, which has been designed to meet the needs of you, the angler.

It's for this reason that you'll find our logo everywhere at commercial venues, with angler's finding our selection of luggage perfect for their angling requirements. Whether it's anglers demanding the very best from our Monster and Hardcase ranges, or those opting for a more affordable option in the Competition range, there's something for all anglers of all abilities, with what we believe to be the most comprehensive luggage range on the market.

We recognise that luggage has to withstand a lot of punishment, traveling between waters and from peg to peg. If the quality isn't there, the reliability of the product suffers and your luggage ends up in bits. Here at Preston Innovations, we test all of our luggage to destruction, to make sure it can cope with the rigours of modern fishing. So whatever the range you choose, you can be sure so long as it's bearing the Preston Innovations logo it will stand up to anything you can throw at it.

“Hardcase Monster Luggage is big enough to carry all the kit I need – even in World Championship situations.”

PRESTON INNOVATIONS HARDCASE MONSTER

This new range has been designed for modern match anglers who use barrows and trollies to transport their tackle. Made from the very best materials, the Monster provides a total solution to transporting rods, poles, bait, reels, nets and accessory tackle.

Over recent years the amount and type of luggage match anglers carry has changed significantly. Large pole rollers, different baits, feeders and floats are all necessities we can't be without on the bank. The solution? The Monster Luggage range.

It's Preston's answer to the changing demands of the modern angler. Starting from the ground up, we have designed each piece of luggage so that it can be used in varying combinations to suit individuals needs.

Trollies and barrows have become far more popular since the inception of better paths around commercial fisheries. The likes of the Preston Space Shuttle allow you to take a vast range of kit to your peg. As such, the Monster Luggage range has been developed to work in conjunction with trollies and barrows – meaning that you can quickly and easily load up your gear.

In the past, anglers had to carry several carryalls, net bags, pole roller kits, tripods and so on — in addition to a seat box, rods or poles, reels, not

to mention line, bait and accessories. Monster Luggage offers a stylish, simple and effective solution to this problem. The Monster Tackle and Accessory Bag and the Monster Tackle and Net Bag cater for all anglers. Easily accommodating two or more keepnets, side trays, a whole load of seat box accessories, landing nets, pole rollers and more. This ensures you're able to get to your peg quickly – and more importantly – with all the gear you could possibly need.

Also featured in the range are two versatile Feeder and Accessory Bags. Available in large or small, these stylish and practical bags enable you to quickly choose the tackle you need and get on your peg – with no messing. Firstly, there are two removable pouches which allow you separate your feeders – allowing you to grab just the ones you need for a particular swim. Also supplied with the kit is a plastic box that stows neatly in the lid. This is perfect for storing a variety accessories – again allowing quick and easy access. The outside pockets are designed to fit the InBox hooklength retaining systems – these are available separately

so you can choose the set-up that suits your needs. So, the Feeder and Accessory Bags are ideal if you have drawn a 14m wide peg on a snake lake – as you can leave behind that bag of heavy feeders, and just take with you what you need. The Monster Rod Holdalls really live up to their name. They have the capacity to carry all your pole fishing gear in their huge main compartments, safely protected in this superb bag. What's most impressive, however, is the innovative outer pockets. These feature sleeves that can quickly be added and/or removed as required. Each will accommodate up to two rods per sleeve. As you'd expect, the Hardcase environment offers unparalleled protection for your valuable poles and rods. Combine this with the comfortable padded carry straps and you have the perfect rod holdall. All in all, the Monster Luggage range offers ease of use, security and flexibility. Catering for the mammoth amount of gear match anglers now need just to keep up with the competition. Try it for yourself and you'll soon see why it's so massively popular up and down the country.

High quality quick-release clips

Padded shoulder straps

Velcro closing carry handle

High quality plastic clips

Heavy-duty waterproof material

MONSTER HARDCASE TACKLE & NET BAG

This bag has been added into the range to cater for the angler who wants to carry their nets and accessories together, the front compartment will easily accommodate two keepnets and your trays whilst the two folding compartments (20cm(h) x 65cm(w) x 15cm(D) each) will take rollers and off box accessories or bait. It features carrying handles and an adjustable padded shoulder strap which makes carrying easy.

41cm(H) x 65cm(W) x 30cm(D)

MONSTER HARDCASE TACKLE & ACCESSORY BAG

This bag has been developed after several of our consultants expressed the opinion that the traditional carryall was no longer the best way to carry the vast amount of gear they find themselves using due to the amount of bulky rollers and other accessories now carried. This unique carryall type bag has two fold out compartments at the top designed to take two rollers, along with pole supports and any other accessories you need. The large base compartment will take bait or larger tackle items (its also large enough to accommodate a Monster Hardcase Feeder Accessory Bag).

41cm(H) x 65cm(W) x 30cm(D)

**NEW**

■ MONSTER HARDCASE HOLDALL

The Hardcase Monster Holdall for up to four ready-made rods and all your pole gear. Particularly suitable for festivals, the Monster comes complete with two removable rod sleeves, which can each hold two ready-made rods. The two back compartments will take up to eight tubes and feature Hardcase construction and have a padded division, making them suitable for storing poles and top kits.

190cm(H) x 26cm(W) x 36cm(D)

■ MONSTER HARDCASE SINGLE ROD HOLDALL (190CM)

The Monster Hardcase Single Rod Holdall 190cm comes with two pockets. One takes a rod sleeve (supplied), which will hold two made up rods with sections of 6' or less, and the other which features padding to take a pole and kits or rods. Has a padded none slip shoulder strap and padded carrying handles. Perfect for two piece 12' float and feeder rods.

190cm(H) x 15cm(W) x 36cm(D)

■ MONSTER HARDCASE ROD HOLDALL (160CM)

At 160cm long this holdall will accommodate up to four made up rods with sections up to 160cm (63") in length in its two removable sleeves. This makes it ideal for three piece float and feeder rods. There are also two full length back pockets which will take an umbrella or spare rods in tubes. For easy transport there is a padded none slip shoulder strap and padded carrying handles

160cm(H) x 26cm(W) x 24cm(D)

■ MONSTER HARDCASE SINGLE ROD SLEEVE (190CM)

This sleeve is the same as the one in the Monster Hardcase 190cm and will accommodate two made up rods with sections up to 190cm (6') in length making it perfect for two piece 12' rods. It can be used on its own, in combination with other Monster Holdalls or used to store spare made rods at home or in the car.

190cm(H) x 13cm(W) x 14cm(D)

■ MONSTER HARDCASE FEEDER & ACCESSORY BAG

Developed to accommodate a selection of feeders in the two pouches, which are included. There is also a plastic box which will accommodate wagglers, pellet wagglers and splashers wagglers. The box features dividers that can be positioned as you require. The other pockets will accept the two sizes of In Box Hooklength Retainers.

This bag has been designed to carry all the terminal tackle you require to fish with a running line (float and feeder) and is perfect for anglers carrying ready made rods as you only need to take what is required to you peg.

22cm(H) x 46cm(W) x 33cm(D)

■ MONSTER HARDCASE TRIPLE NET BAG

Designed with three waterproof lined compartments each of which will accommodate three keepnets. There are two additional outside pockets which will accept landing nets and Off Box side trays.

48cm(H) x 56cm(W) x 15cm(D)

■ MINI MONSTER FEEDER BAG

Designed to accommodate both feeders and floats it has two small pouches inside ideal for separating different sorts of feeders to keep your gear organised the lid features a rigid plastic box suitable for the safe storage of floats the outside pocket will fit the small InBox hooklength retaining system (not included)

20cm(H) x 28cm(W) x 18cm(D)

■ MONSTER HARDCASE CATAPULT POUCH

Top opening catapult pouch for storing all your catapults. Protects elastics from damage and helps prevent the tangled mess, which can occur in the bottom of your carryall.

■ MONSTER HARDCASE MEGA BAIT BAG

The Mega Bait Bag has a large insulated main compartment big enough to accommodate all bait requirements and is fitted with an adjustable non slip padded shoulder strap and padded carrying handles for easy transport.

22cm(H) x 50cm(W) x 32cm(D)

PRESTON INNOVATIONS
HARDCASE
MONSTER

Zipped end pocket.

Large front pocket.

Padded carrying handles.

Rod Holdalls have an in-built stiffener to protect rods.

The Preston Hardcase Luggage range is totally different and hugely popular. The Rod Holdalls, Pole Holdalls and Rod Holders have a built-in protective stiffener and, along with the Carryalls, also include a solid base for protection.

INSULATED COOL (BAIT) BAG

Thermally lined, with a wipe-clean main pocket, the Hardcase coolbag has a solid hard base and will hold four two pint bait tubs, along with space for ice packs.

The large outside pocket is perfect for carrying catapults and other accessory products. 24cm(H) x 36cm(W) x 24(D)

CARRYALL – HARD BASE

The large main compartment of the Hardcase Carryall has a 55ltr capacity, big enough to carry rollers and other large accessories. There are also four outside pockets, two zipped end pockets and two full sized net and side tray pockets.

45cm(H) x 55cm(W) x 30cm(D)

TIP TUBE

At around 30" long (760mm), the Hardcase Tip Tube provides excellent protection for spare quivertips. The full length zip opens the tube along its total length allowing easy selection of tips and preventing delicate guides being damaged when being placed into the tube. 76cm(H) x 6cm(W) x 6cm(D)

REEL CASE

A compact, safe way of carrying expensive reels. Featuring a Hardcase design, with added padding for maximum protection. A full length zip makes for easy opening.

SMALL/MEDIUM ROD HOLDALL

The Small and Medium Hardcase Holdalls are perfect for anglers who don't carry vast amounts of rods and poles.

The Small version holds around six tubes, whilst the Medium sized version will hold around eight.

Both Holdalls also feature an outer umbrella pocket and an internal bankstick pocket for additional storage.

Small - 190cm(H) x 20cm(W) x 16cm(D)

Medium - 190cm(H) x 26cm(W) x 16cm(D)

SINGLE/DOUBLE ROD HOLDER

Perfect for carrying made-up rods, the Rod Holders come in two lengths and two capacity options.

The shorter version is 160cm long and is ideal for three piece float and feeder rods, the 180cm version takes two piece feeder rods up to 12' in length.

Both lengths are available in one rod or two rod versions.

160 or 180cm(H) x 12cm(W) x 9 or 16cm(D)

Competition Rod Sleeve

8/10/12 TUBE HOLDALL

Now zipped to the base to allow easy access to the main compartments, which have elasticated straps to hold tubes and poles. Large $\frac{3}{4}$ pocket for brollies and landing net handles plus shorter outside bankstick pocket with reinforced base.

190cm(H) x 24cm(W) - 8 Tube. 190cm(H) x 28cm(W) - 10 Tube. 190cm(H) x 28cm(W) - 12 Tube.

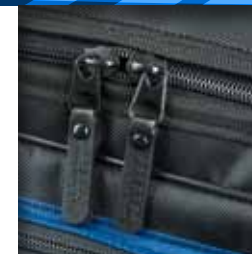

COMPETITION ROD SLEEVE 160CM

Designed to carry up to three made-up rods with reels, with the extra protection of padded reel pouches. On the other side (divided by padding) is room for four unmade rods. Supplied with seven sets of rod bands and tip protectors, the internal divider and outer shell are padded for extra protection. Accommodates rod sections up to 160cm. 160cm(H) x 30cm(W) x 10cm (D)

45L/55L CARRYALLS

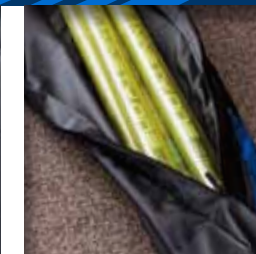

These now have two pockets on the front to make carrying easy. They also feature two zip-end pockets and a large main compartment. 26cm(H) x 45cm(W) x 25cm(D) - 45L 45cm(H) x 55cm(W) x 30cm(D) - 55L

High quality zips and tags will not let you down on the bank.

Durable wipe clean fabric – designed to cope with plenty of abuse.

Holdalls feature full length zips for easy access to your gear.

Velcro tip protectors keep the ends of rod sections together and protected.

Velcro rod bands hold the base of sections securely together.

COMPETITION

Manufactured from a high quality, wipe clean fabric, the Competition Match Luggage has been designed by Preston Innovations to perform to the highest standards. With the emphasis on quality, the comprehensive range includes two Carryalls (45 litre & 55 litre capacity) a Double Net Bag, two Bait Bags, four Rod Holdalls (Competition Rod Sleeve, 12 Tube, 10 Tube and 8 Tube), Rod Tip Protectors and new for 2010 high quality Reel Cases in two sizes.

MEGA/STANDARD BAIT BAG

Two sizes both with large outer pockets and easy to clean thermal lined main compartment. 22(H) x 20(W) x 40(D) - Standard 32(H) x 22(W) x 50(D) - Mega

DOUBLE NET BAG

Two large main compartments for keepnets and a smaller outer pocket for bait trays, riddles etc. 48cm(H) x 56cm(W) x 10cm (D)

GROUND BAIT BOWL

Four groundbait bowls of various sizes including one with a lid making it ideal for carrying groundbait and fishing in adverse weather conditions. Small, medium and large. 20 litre with lid.

ROD TIP PROTECTORS

Designed to protect the ends of made-up rods in transit. The base sleeve has an adjustable cord for tightening whilst the tip sleeve has a Velcro tightening strap.

REEL CASES

Padded for protection and finished in black and blue to match Competition luggage. Single or Double size available.

NEW

CLOTHING

Here at Preston Innovations, we recognise that when you go fishing, you need the right clothes for the right job.

You see when sat on a seatbox, anglers move in certain ways and all our clothing has been developed to make things as comfortable for the fisherman as possible.

The jackets, for example, have wider shoulders that are less restrictive when shipping back a pole or casting, whilst the bib and brace design enables you to lean forward easily without tightening, with adjustable elasticated straps and wide opening leg bottoms.

To complement the outer garments we also provide a range of fleeces, sweatshirts, shirts, underwear, hats and boots, all of which can be worn by themselves or under the jackets for additional protection from the elements.

"With the kind of weather we experience in Britain, there is no question that quality clothing is an absolute necessity," insists UK Champion and Preston Innovations consultant Tommy Pickering. "You can put your trust in Preston Innovations to ensure there is a range of angling clothing that won't break the bank."

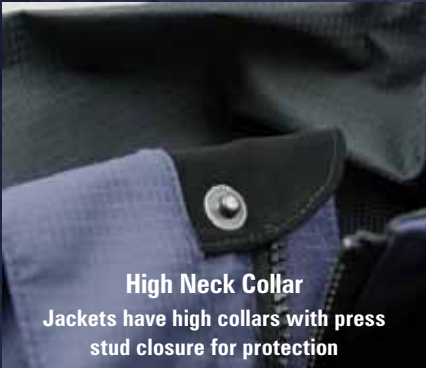

Zips & Storm Flaps
Quality zips are covered by storm flaps for added water protection

Sleeve Cuffs
Sleeve cuffs are made from Neoprene to prevent water running into arms

Bib & Brace
Bib & Brace have wide, adjustable, elasticated straps for comfort

High Neck Collar
Jackets have high collars with press stud closure for protection

■ DRIFISH 500 JACKET & BIB & BRACE

Made from high performance waterproof and breathable material, with a minimum waterproof rating of 5000mm, the Drifish 500 Jacket and B&B Combo is feature-packed and offers amazing value for money.

The Jacket has extra room around and under the shoulders to give more freedom of movement. Other key angling features include neoprene cuffs - great for stopping water and a specially designed hood that offers great visibility and actually moves with your head.

500 Jacket Features:

- Special Hood allows greater visibility whilst still offering full protection
- Gusseted cut to give more freedom of movement
- Storm Flap
- Zip Closure
- Neoprene Cuffs

500 B & B Features:

- Adjustable Straps
- Storm Flap Zip Closure
- Wide Opening Leg Bottoms

Drifish clothing has advanced features designed for performance in all weather.

■ CELSIUS SUIT

Totally waterproof and seriously hot, the Drifish Celsius range is the warmest angling clothing you're ever likely to see...or need.

Designed for fishing in the coldest conditions, the thermal 'hollofil' lining traps your body heat with maximum efficiency, yet doesn't impede movement. In fact the Celsius is so warm you only need a minimum of additional clothing underneath it.

Combine the ¾ length Jacket and Bib & Brace and you have the ultimate combination for cold conditions.

Celsius Jacket Features:

- Detachable Wire Peaked Hood
- Fleece Collar Lining
- Velcro Storm Cuffs
- Waist Adjustable

Celsius B & B Features:

- Adjustable Straps
- Storm Sealed Zip
- Reinforced Knee Pads
- Reinforced Seat Pad
- Warm Fleece Lined Pockets

PERFORMANCE FISHING CLOTHING

■ DRIFISH TWIN-LAYERED BOOTS

These boots have been developed to provide warmth and comfort in the worst weather conditions. The mid-calf length cut of the boot and the flexible nature of the Neoprene guarantee a perfect fit and minimises heat loss. 100% waterproof with a high grip flexible sole. The thermal lining is fully removable to allow replacements to be fitted and features a reinforced heel for durability.

DRIFISH™
PERFORMANCE FISHING CLOTHING

■ DRIFISH NECK WARMER

Simple but brilliant. Made from windproof fleece the Drifish Neck Warmer is worn around the neck and eliminates heat loss from the neck area in winter.

NEW

■ PRESTON HOODED PULLOVER FLEECE

A practical, warm, lined pullover fleece that can be worn as an outer layer in warm weather or as part of a layer system under waterproof clothing. This two tone fleece features a front pouch pocket, two side pockets, drawstring hood and a quarter top zip.

NEW

■ PRESTON WINDPROOF HOODED FLEECE

Manufactured from a windproof, breathable polar fleece fabric that is soft, comfortable and warm. Ideal as an outer garment or as an additional layer under waterproofs. Features full length zip, two side pockets and a drawstring adjustable hood.

NEW

■ PRESTON COMPETITION SOFT SHELL JACKET

Short Competition Jacket manufactured from a two tone contrasting water resistant soft shell outer fabric lined with warm fleece material. Features full length zip, two side pockets, elasticated cuffs.

■ QUILTED UNDERSUIT

The Quilted Undersuit is a hi-tech thermal quilted undersuit designed to be worn over a base layer and under waterproof outer layers in cold weather. The two piece construction means that the trousers can be worn separately giving freedom of movement. Features a full length front zip, fold down collar and elasticated cuffs for additional warmth.

■ PRESTON 2 PIECE UNDERWEAR

Soft microfleece fabric retains heat whilst wicking away moisture. For maximum performance wear as a base layer next to the skin. When worn as part of a layered thermal system the Drifish Thermal Undersuit will dramatically increase your comfort levels. Team with Drifish fleeces and outer rainwear for total protection from the elements.

NEW

■ WINTER HAT

Made from warm fleece, the Winter Hat is designed for extreme winter conditions. With full sides the cover the ears as a Velcro chin strap for a snug fit the winter hat is an advanced version of a traditional balaclava. The sides can be folded up if required.

■ HEADGEAR

The long peaked Preston Baseball Cap is great for cutting out the glare from the sun whilst the Fleece Hat minimises heat loss from the head in winter.

“The Preston Innovations clothing range stands out for me – being both stylish and practical on and off the bank.”
